Re: Non-Standard Gas Proration Unit, Jalmat Gas Pool, Lea County, New Mexico

Gentlemen:

307.24 Ac.

It is respectfully requested that the Conservation Commission approve our application for a 320 acre non-standard gas proration unit embracing the west half, Section 19-22S-36E, Lea County, New Mexico, and to be assigned to the Closson "B" No. 8.

In support of this application, we wish to state the following:

1. The Closson "B" No. 8, located 660' FWL and 1980' FSL, Section 19-22S-36E, has been completed as a gas well from within the vertical limits of the Jalmat Gas Pool.
2. This non-standard gas proration unit consists of contiguous quarter/quarter sections within a single governmental section and the entire unit may reasonably be presumed to be productive of gas.
3. All operators owning interest within 1500' of the Closson "B" No. 8 have been furnished copies of this application by registered mail.
4. A plat of the area indicating the proposed non-standard gas proration unit and offset ownership is attached.

Completed in Texas for 2,100' on 2/28/56

An exception to Rule 5-A, Order R-520, permitting the assignment of 320 acre non-standard gas proration unit to this well is requested.

Respectfully submitted,  
CITIES SERVICE OIL COMPANY
