RE: State 25 Com No. 1
30-015-22985
C-107-A – Application for Downhole Commingling – Parkway; Wolfcamp & Parkway; Strawn

Dear Mr. Jones,

Enclosed is an original Form C-107-A (Application for Downhole Commingling) for the well mentioned above.

This well is currently flowing from the Wolfcamp (9768-9790') with the Strawn (10564-10732') behind RBP @ 10382'. There are Morrow perfs (11392-11684') behind CIBP @11330' w/ 35' cmt.

Cimarex proposes to remove the RBP between the Wolfcamp and Strawn and DHC the two zones. The allocation percentages are based on past Strawn production (last representative Strawn test before it loaded up with fluid, according to our engineer, was January 2008) and current Wolfcamp flow tests.

It is anticipated that the reservoir pressure from these two zones will be compatible and the resulting volumes would not warrant a casing/tubing dual completion.

Royalties and working interest ownership are identical in both zones. Overriding royalties are the same owners but there will be differences in the percentages due to the different spacings for the Wolfcamp (40 acres) and Strawn (160 acres) zones.

If you have any questions or need further information, please call me at 432-620-1938.

Sincerely,

Zeno Farris
