Subject: Proposed Surface Commingle
Bolack 4 #1 and Bolack 4 #2
San Juan County, NM

Dear Mr. Ezeanyim & Mr. Lovato:

XTO Energy Inc. requests administrative approval for surface commingling of natural gas produced from the following wells: Bolack 4 #1 and Bolack 4 #2. These wells are located in Section 04-Township 27N-Range 11W in San Juan County, New Mexico.

XTO plans to produce the commingled gas through a central compressor, thus minimizing the footprint on these locations as well as helping to keep the emissions and noise levels down. This increases the ultimate recoveries on all leases. The anticipated allocated production and fuel usage for the compressor is noted in the attachments.

Each well will be equipped with allocation meters that will be maintained by XTO Energy in accordance with State and Federal Regulations (Onshore Order No. 5). Produced liquids will not be surface commingled. All interest owners have been notified via certified mail, return receipt, on March 17, 2010.

The following attachments are included with this application:

- Form C107B (application for surface commingle; diverse ownership)
- Map of all wells and their associated leases
- Form C-102 for each well (plats)
- Table of well & lease and agreement information, spacing, permits, gravities/BTU, MCF
- Schematic diagram showing all flowlines, compressors & equipment
- Details of allocation formula
- Letter to WI, NRI & ORRI owners & list of owners
- Administrative Application Checklist

Sincerely,

A handwritten signature in cursive script that reads 'Jennifer Morrow'.

Proposed Allocation Procedure

Base Data:

W = Gas volume (MCF) from allocation meters at individual wells during allocation period

X = Gas volume (MCF) from CDP sales meter during allocation period

Allocation period is typically a calendar month and will be the same for all wells.

Production and fuel use will be based on the following formula:

$$\text{Allocated sales volume (MCF)} = (W / \text{Sum } W) \times X$$

NOTE: Production liquids will not be surface commingled.

Compressor information:

Location:	Alice Bolack 4#1	
Lat/Long:	36.60359/-108.01126	
Manufacturer:	CATERPILLAR	
Engine:	G3306NA	
Horse Power:	90	
Fuel usage:		
100%	21.6	mcfd
75%	18.3	mcfd
50%	15.1	mcfd

RE: Notice to Working and Royalty Interest Owners
Application to Surface Commingle Gas Production
San Juan County, New Mexico

XTO Energy Inc. is applying to the New Mexico Oil Conservation Division (NMOCD) and Bureau of Land Management (BLM) for approval to surface commingle gas production from the Bolack 4 #1 and Bolack 4 #2 wells. NMOCD requires that all interest owners be notified of plans to surface commingle when ownership is different between wells.

Produced gas from each well will be measured separately prior to being commingled. We plan to produce the commingled gas through a shared compressor. Produced liquids will not be surface commingled. In the future, additional wells, pools, and acreage may be added to this surface commingle or this gathering system.

If you need additional information, or have any questions, please contact me at (505) 333-3682. If you have an objection to our application, you must file a protest in writing to the NMOCD Santa Fe office at 1220 South Saint Francis Drive, Santa Fe, NM 87505 within 20 days from the date of this letter. If there are no objections raised, an application will be submitted to NMOCD at that time.

Sincerely,

A handwritten signature in cursive script that reads "Jennifer Morrow".
