Re: Waggoner #1 Well  
B.M.N.S. Co. Operator  
Fulcher-Kutz P.C. Pool  
Sec 29-30N-12W

Attention: Mr. C. M. Rieder, District Engineer

Gentlemen:

In compliance with your letter of March 30, 1955, and memorandum and orders relative to non-standard gas proration units in the Northwestern Gas Pools, the B.M.N.S. Company submits the following information:

1. The Waggoner #1 well is located 2100 feet North of the South line and 1670 feet East of the West line of Section 29, Township 30 North, Range 12 West, N.M.P.M., Unit "K", in the Fulcher-Kutz Pictured Cliffs Gas Pool.

2. The non-standard unit comprises 40 acres and said well was completed June 3, 1946, at which time present spacing requirements were not in effect. This well is connected to the Southern Union Gas Company line.

3. The proposed non-standard unit lies wholly within a single governmental section.

4. The entire unit may reasonably be presumed to be productive of gas.

5. A copy of this letter, advising of the intent to form this non-standard unit, is being sent to all offset operators by registered mail.

6. Plats showing location of well and offset operators are attached.

The writer respectfully requests consideration of this application for approval of the above non-standard unit under provisions

### INSTRUCTIONS

1. Is this gas well a dual completion? Yes \_\_\_\_\_ No \_\_\_\_\_
2. If the answer to Question 1 is Yes, are there any other  
dually completed wells within the dedicated acreage?  
Yes \_\_\_\_\_ No \_\_\_\_\_

A separate plat must be filed for each gas well, outlining the area dedicated to such well and showing the location of all other wells (oil and gas) within the outlined area.

Mail in duplicate to the district office for the district in which the well is located.
