Re: Application of Mewbourne Oil Company for Administrative Approval of an Unorthodox Well Location for its Wyatt Draw North "18 / 19" LD Well No. 1 H, to be drilled from a surface location 2490 feet from the South line and 350 feet from the West line (Unit L) of Section 18 to a bottomhole location 990 feet from the North line and 350 feet from the West line (Unit D) of Section 19, both in Township 19 South, Range 26 East, N.M.P.M., Eddy County, New Mexico.

#### Dear Mr. Fesmire:

Pursuant to the provisions of Oil Conservation Division General Rule 19.15.15.13 NMAC, Mewbourne Oil Company hereby seeks administrative approval of an unorthodox oil well location for its Wyatt Draw North "18 / 19" LD Well No. 1 H to be drilled as a horizontal well at an unorthodox surface location 2490 feet from the South line and 350 feet from the West line (Unit L) of Section 18 to a true vertical depth of approximately 2,870 feet with a measured depth of approximately 6,100 feet and then in a southerly direction to a bottomhole location 990 feet from the North line and 350 feet from the West line (Unit D) of Section 19, both in Township 19 South, Range 26 East, N.M.P.M., Eddy County, New Mexico. This well will evaluate the Undesignated Yeso formation for oil production. A 120-acre horizontal well project area comprised of the W/2 SW/4 of captioned Section 18 and the NW/4 NW/4 of captioned Section 19 will be dedicated to the well in the Yeso formation.

This well is governed by the General Rules and Regulations of the Oil Conservation Division which provide for oil wells to be located on spacing units consisting of approximately 40 contiguous surface acres with wells located no closer than 330 feet to a boundary of the unit. This well location is unorthodox in the Yeso

formation because it is 2490 feet from the Southline of Section 18 - or 180 feet closer to the project area boundary than permitted by the applicable rules.

This unorthodox oil well surface location is needed to enable Mewbourne to maximize the horizontal portion of the wellbore in the Yeso formation. The horizontal portion of the wellbore in the Yeso formation will be within the well's producing area. Attached hereto as Exhibit A is a plat showing the location of the subject spacing unit, the proposed unorthodox well location and adjoining spacing units and wells. Exhibit B is a copy of the Acreage Dedication Plat for the well (Division Form C-102) that shows the surface survey location of the well.

Exhibit C is a list of affected persons as defined in Paragraph (2) of Subsection A of 19.15.4.12 NMAC. A copy of this application, including all attachments, has been mailed to each of these offset operators/affected persons by certified mail-return receipt requested in accordance with Rule 19.15.4.12 A (2) (a). Each owner has been advised that if it has an objection to this application it must be filed in writing with the Division's Santa Fe office within twenty days from the date this notice was sent.

Your attention to this application is appreciated.

William F. Carr

Mewbourne Oil Company Working Interest Owner

Yates Petroleum Corporation 105 South Fourth Street Artesia, New Mexico 88210 Attn: Chuck Moran September \_\_, 2010

Mewbourne Oil Company 500 West Texas, Suite 1020 Midland, Texas 79701

Attention: William F. Carr

Administrative Order NSL-

Dear Mr. Carr:

Reference is made to the following: (i) your application dated August \_, 2010 on behalf of the operator, Mewbourne Oil Company ("Mewbourne"); and (ii) the records of the New Mexico Oil Conservation Division ("Division") in Santa Fe: all concerning Mewbourne's request for approval of a non-standard oil well surface location to be applicable to the Undesignated Yeso formation, which is governed by Oil Conservation Division General Rule 19.15.15.9 NMAC.

A horizontal well project area comprised of the W/2 SW/4 of Section 18, and the NW/4 NW/4 of Section 19, Township 19 South, Range 26 East, NMPM, Eddy County, New Mexico is dedicated to this well to form a non-standard 120-acre oil spacing and proration unit.

This application has been duly filed under the provisions of Rule 19.15.15.9 NMAC.

The data submitted with this application indicates that this unorthodox oil well surface location is required to maximize the horizontal portion of the well bore within the well's Yeso formation horizontal well producing area. The producing portion of the wellbore will not be closer to the outer boundary of the project area than permitted by statewide rules.

By the authority granted me under the provisions of Rule 19.15.15.9 NMAC of the general rules of the Oil Conservation Division, the following described unorthodox oil well surface location within this 120-acre unit / project area is hereby approved:

Wyatt Draw North "18 / 19" LD Well No. 1 H Surface Location: 2490' FSL & 350' FWL (Unit L) Section 18, Township 19 South, Range 26 East, NMPM Bottomhole Location: 990' FNL & 350' FWL(Unit D) Section 19, Township 19 South, Range 26 East, NMPM Eddy County, New Mexico.

Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.

Sincerely,

Mark E. Fesmire, P.E., J.D.

Director

Subject:

Mewbourne - Wyatt Draw North 18-19 #1H; NSL Application

Dear Bill

I have received the referenced NSL application for a horizontal well.

I will need to know the footage location of the "penetration point" of the Yeso formation, so I can include this information in the order.

Thanks

David

Re: Mewbourne Oil Company Applications

Dear David:

Mewbourne Oil Company has advised that the penetration points in the Bone Spring formation for the following wells are their surface locations:

Bradley 28 Federal Com Well # 2H:

1580' FNL & 65' FWL

Section 28, T-18-S, R-30-E

Bradley 29 Federal Com Well #2H:

2150' FSL & 260' FEL

Section 29, T-18-S, R-30-E

Wyatt Draw North 18/19 LD Well # 1H:

2490' FSL & 350' FWL

Section 18, T-19-S, R-26-E

Spyglass 17 Federal Well # 1 H:

2135' FNL & 330' FWL

Section 17, T-19-S, R-33-E

Very truly yours,

William F. Carr
