Santa Fe, New Mexico

Gentlemen:

Tenneco Oil Company requests administrative approval of two non-standard proration units in the South Hospah Upper Sand Pool. These non-standard proration units are shown on the attached plat. Each unit will contain 52 acres, more or less. The wells to be located on these units are as follows:

South Hospah Unit No. 26  
South Hospah Unit No. 20

The reason for this non-standard proration unit is that Section 12 is oversized, having four lots of approximately 12 acres each located along the east line of the section. Each of the two wells will be located not less than 330 feet from the east line of Section 12, T-17-N, R-9-W, McKinley County, New Mexico.

The offset operator, Tesoro Petroleum Company, has been notified of this request and asked to return a waiver of objection to you.

Yours very truly,

TENNECO OIL COMPANY

Gentlemen:

Tenneco Oil Company wishes to apply to the New Mexico Oil Conservation Commission for two non-standard proration units in the South Hospah Upper Sand Pool. These proration units will be 52 acres in size. These unorthodox units are necessary by the fact that the section is irregular in size and includes four 12 acre lots down the East line of the section.

Three copies of a waiver of objection are attached. Please forward one copy to the New Mexico Oil Conservation Commission and return one copy to Tenneco Oil Company. One copy is provided for your files.

Your cooperation is appreciated.

Yours very truly,

TENNECO OIL COMPANY
