If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* A temporary hose failed while circulating the well, the hose was removed and the well put back on production.

Describe Area Affected and Cleanup Action Taken.* Approximately 2500 sq.ft. of caliche well pad, 1620 sq. ft. of caliche road, and 525 sq.ft. of pasture land were affected by the release. All of the free product was removed with a vacuum truck and the heavily saturated soil was excavated from the well pad and pasture, then transported to CRI. Soil samples were collected after the initial response and field tested for the presence of chlorides. Remediation activities will resume following the results of the soil sample results.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
