Section 12, T17S, R37E

Lea County, New Mexico

Dear Mr. Curry:

Pursuant to New Mexico Oil Conservation Division (NMOCD) Rule 19.15.15.13 D, you are hereby notified that on March 11, 2011, Nearburg Producing Company made application to the NMOCD for administrative approval for an unorthodox well location for its Howenstine 12 Well No. 1 at the surface and bottom-hole locations reflected above for a well to be drilled to the Strawn formation, Shipp-Strawn Pool, in Lea County, New Mexico. A copy of the application is enclosed.

As the owner of an interest that may be affected, you have the right to object to the application. To do so, you must file a written protest with the NMOCD within twenty days. Failure to do so will prevent you from challenging the matter at a later time. A letter of protest may be sent to the NMOCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505.

Howenstine 12 Well No. 1 (Test Well)
Lovington Strawn Prospect
500' FNL and 1594' FEL (Surface Hole Location)
330' FNL and 1570' FEL (Bottom Hole Location)
Section 12, T17S, R37E
Lea County, New Mexico

Dear Len,

As you may recall, back in 1989, Nearburg and its participants, which includes you, purchased a mineral interest in the E/2 of Section 1, T17S, R37E, Lea County, New Mexico, with such interest currently being unleased. As previously advised, on our new Lovington Prospect, we reprocessed the 3D on the above Prospect, which slightly altered the Bottom Hole Location of the captioned Test Well, the Howenstine 12 Well No. 1, which is now located as stated above. Such location is directly south of your unleased mineral interest.

Note that most New Mexico Pool rules with similar oil production from similar depths as anticipated from the Howenstine allow wells to be located 330' or greater to a lease line; however, as to the Howenstine location, which is in the Shipp (Strawn) Pool, it is required to be located within a 150' radius of a circle centered in a quarter quarter subdivision of such section. Since the Howenstine location is not within such 150' circle, such location is therefore considered a non-standard or unorthodox location, which requires NMOCD approval for the well to be produced. Please see the plat attached hereto which denotes the Howenstine BHL, the 330' distance from such location to the lease line, the 150' circle in which a orthodox location needs to be placed, and the lands in which you are a un-leased mineral interest owner, which is marked in blue.

To receive approval from the New Mexico Oil Conservation Division (NMOCD), a NMOCD hearing can be applied for, or, if waivers from offsetting owners can be obtained, then the NMOCD will grant such approval administratively. For timing purposes, Nearburg is trying to get waivers signed from all the offsetting owners to allow the drilling of the Howenstine well at the desired location. So far all owners have agreed to grant us the requested waiver.

Note that in addition to the Howenstine well, the other well that we plan to drill in this Prospect immediately after the Howenstine is the Honey 13 # 1 well. It is in the same Shipp (Strawn) Pool, and is also at an unorthodox or NSL location, and which we are also attempting to get waivers from offset owners. Again, no one has objected to granting us a waiver. Since we have a rig that is ready to drill either well, the first well that gets the requisite waivers first will be the first well drilled in this Prospect.

We respectfully request that you agree to grant us a waiver to such well's location by executing and returning the Waiver Notice which is attached hereto. Please note that after the Howenstine and/or Honey well is drilled and completed as a producing well, we plan to amend the Shipp (Strawn) Pool rules to prevent this situation from occurring elsewhere in the Prospect. **In case we have to show the waivers to the NMOCD, please sign the attached letter and return to me as soon as possible. If this is not easily done, please email me your approval of the waiver as soon as possible and sign/return the attached letter when you can.**

Thanks for your cooperation in this matter. Let me know if you have any questions.

Best regards,

Duane

Lea County, New Mexico

Dear LDH Holdings LLC:

Pursuant to New Mexico Oil Conservation Division (NMOCD) Rule 19.15.15.13 I, you are hereby notified that Nearburg Producing Company has on this date made application to the NMOCD for administrative approval for an unorthodox well location for its Howenstine 12 Well No. 1 to be drilled at the surface and bottom-hole locations reflected above for a well in the Strawn formation, Shipp-Strawn Pool, in Lea County, New Mexico. A copy of the application is enclosed.

As the owner of an interest that may be affected, you have the right to object to the application. To do so, you must file a written protest with the NMOCD within twenty days. Failure to do so will prevent you from challenging the matter at a later time. A letter of protest may be sent to the NMOCD at 1220 South St. Francis Drive, Santa Fe, New Mexico 87505.

Ken,
I have printed out the Unorthodox Well Consent Letter on the Howenstine 12 Well No. 1 from Scott Hall of the Montgomery & Andrews Law firm dated March 15, 2011 and have signed it and mailed it to you at your Midland, Tx address. Fred Schlicher

Here it is Fred. Thanks.

From: Ken Dixon
Sent: Wednesday, March 16, 2011 3:16 PM
To: 'fredschlicher@comcast.net'
Subject: Howenstine 12 #1--Application for Unorthodox Location
Importance: High

Fred,
I have been trying to get in touch with you by telephone. I have also left a message at Dan Bruhl's office. Nearburg plans to drill the well denoted on the attachments. Several years ago, B&S Enterprises was granted a mineral interest by Nearburg in the E/2 of Section 1 to the north of this proposed well. It is now my understanding that B&S Enterprises is no longer in existence and that any interest owned by B&S Enterprises is now owned equally between yourself and Dan Bruhl. We just learned that we need an Unorthodox location for the well since we are not within a 150' radius of the center of the NW/4NE/4 of Section 12. We do plan on our bottom hole location to be 330' from the north line of the section, which is an approved stepout under other Strawn Pool rules in the surrounding area. We have a rig standing by until we sort this matter out. We are requesting that Dan and you both sign your copy of the attached letter and return said signed letter to my attention at the email listed below or by fax to the number listed below. For your information, David Petroleum Corp. acquired a mineral interest under the same conveyance you did and Bill Owen has provided us with a signed letter. Please give me a call at either of the numbers shown below so we can discuss this matter in greater detail.
