Attn: Ms. Jamie Bailey, Director

Re: Applications of RKI Exploration & Production, LLC to downhole commingle production in its Pinnacle State Well No.25 and Longview Federal Well Nos.1-14, 1-34, 1-44 and 6-11 from the South Culebra Bluff Bone Spring and East Hederra Bend Delaware pools.

Dear Ms. Bailey,

Please find enclosed the above-referenced application(s) for downhole commingling on Form C-107A and all supporting data.

RKI Exploration & Production seeks to continually optimize efficiency, both economically and operationally, of its operations. Approval of this application is consistent with that goal as well as the NMOCD's mission of preventing waste and protection of correlative rights.

The Pinnacle State and Longview Federal properties are individually owned by the applicant or its wholly owned subsidiaries. The surface is owned by the State of New Mexico and U.S. Department of the Interior, Bureau of Land Management respectively. Royalties to the state or federal government will not be reduced as a result of this commingling. A copy of this application has been furnished to the Commissioner of Public Lands at the State Land Office as well as the Bureau of Land Management, Carlsbad office. ***Please note that production between leases will not be commingled.***

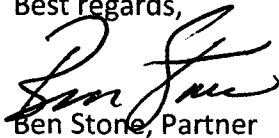

The existing wellbores of the subject wells are currently completed in the Bone Spring formation and RKI intends to perforate and complete the Delaware portion by April 2011 and will immediately conduct production tests on that zone. The vertical extents of separation between completions in the subject formations is well within the 150-percent guideline however, RKI will provide pressure data as it is available from any additional testing that may be conducted. Monthly well tests will be conducted and the wells may be separately metered in the future.

In the future, RKI further intends to apply for pre-approval for downhole commingling of production from additional Pinnacle wells from the East Hederra Bend Delaware and South Culebra Bluff Bone Spring pools. Production from these pools is mature and predictable in the subject area. Such pre-approval would also lend towards increased efficiencies for RKI as well as the NMOCD. This individual well application will be included as the initial dataset for a pre-approved downhole pool combination application. Due diligence for that effort is ongoing and all data in support of such application will be provided including notification to all operators with ownership in the subject pools.

Finally, RKI will provide recommended fixed allocation percentages for these wells after analysis of the data obtained from upcoming production tests.

I respectfully request that the processing of these applications proceed swiftly and if you or your staff requires additional information or has any questions, please do not hesitate to call or email me.

Best regards,

Attn: Mr. Wesley Ingram, Supervisory Petroleum Engineer

Re: Application of RKI Exploration & Production, LLC to downhole commingle production in its Longview Federal Well Nos. 1-14, 1-34, 1-44 and 6-11 from the South Culebra Bluff Bone Spring and East Herradura Bend Delaware pools.

Dear Mr. Ingram,

Please find enclosed a copy of the above-referenced NMOCD application for downhole commingling on Form C-107A and all supporting data.

RKI Exploration & Production seeks to continually optimize efficiency, both economically and operationally, of its operations. Approval of this application is consistent with that goal as well as the NMOCD's mission of preventing waste and protection of correlative rights.

Ownership of the Longview Federal property is individually owned by the applicant or its wholly owned subsidiaries. *The surface is owned U.S. Bureau of Land Management and royalties to the federal government will not be reduced as a result of this commingling.*

The existing wellbores of the Longview Federal wells are currently completed in the Bone Spring formation and RKI intends to perforate and complete the Delaware portion by April or May 2011 and will immediately conduct production tests on that zone. The vertical extents of separation between completions in the subject formations is well within the 150-percent guideline however, RKI will provide pressure data as it is available from any additional testing that may be conducted. Monthly well tests will be conducted and the wells may be separately metered in the future.

In the future, RKI further intends to apply for pre-approval for downhole commingling of production from additional Pinnacle wells from the East Herradura Bend Delaware and South Culebra Bluff Bone Spring pools. Production from these pools is mature and

predictable in the subject area. Such pre-approval would also lend towards increased efficiencies for RKI as well as the NMOCD. This individual well application will be included as the initial dataset for a pre-approved downhole pool combination application. Due diligence for that effort is ongoing and all data in support of such application will be provided including notification to all operators with ownership in the subject pools.

Finally, RKI will provide recommended fixed allocation percentages for this well after analysis of the data obtained from upcoming production tests.

If you or your staff requires additional information or has any questions, please do not hesitate to call or email me.

Producing, Shut-In or New Zone	New Zone		Producing
Date and Oil/Gas/Water Rates of Last Production. (Note: For new zones with no production history, applicant shall be required to attach production estimates and supporting data.)	Date: Estimates inferred Rates: (data attached)	Date: Rates:	Date: 11/30/2010 Rates: 16 o / 64 g / 8 w Per day
Fixed Allocation Percentage (Note: If allocation is based upon something other than current or past production, supporting data or explanation will be required.)	Oil Gas TBD % TBD %	Oil Gas % %	Oil Gas TBD % TBD %

ADDITIONAL DATA

Are all working, royalty and overriding royalty interests identical in all commingled zones? Yes ☒ No ☐
If not, have all working, royalty and overriding royalty interest owners been notified by certified mail? Yes ☐ No ☐
Are all produced fluids from all commingled zones compatible with each other? Yes ☒ No ☐
Will commingling decrease the value of production? Yes ☐ No ☒
If this well is on, or communitized with, state or federal lands, has either the Commissioner of Public Lands or the United States Bureau of Land Management been notified in writing of this application? Yes ☒ No ☐
NMOCD Reference Case No. applicable to this well: _____

Attachments:
C-102 for each zone to be commingled showing its spacing unit and acreage dedication.
Production curve for each zone for at least one year. (If not available, attach explanation.)
For zones with no production history, estimated production rates and supporting data.
Data to support allocation method or formula.
Notification list of working, royalty and overriding royalty interests for uncommon interest cases.
Any additional statements, data or documents required to support commingling.

PRE-APPROVED POOLS

If application is to establish Pre-Approved Pools, the following additional information will be required:

List of other orders approving downhole commingling within the proposed Pre-Approved Pools
List of all operators within the proposed Pre-Approved Pools
Proof that all operators within the proposed Pre-Approved Pools were provided notice of this application.
Bottomhole pressure data.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
