Re: Rule 309.-B. - Administrative Approval, Lease Commingling  
Lotos Federal and Lotos "C" Federal Leases  
Sections 8, 9, 10, and 11, T24S, R31E  
Eddy County, New Mexico

Mr. Catanach:

Sonat Exploration respectfully requests administrative approval for an exception to Rule 309-A to allow commingling of production from two separate leases for the Lotos Federal and Lotos "C" Federal leases located in Eddy County, New Mexico.

Attached is a plat designating the two leases and the formation that each well produces from. It is proposed to only commingle production from the Delaware formation.

A schematic diagram of the proposed commingling facility is attached. Oil, water, and gas from each lease will be separately metered prior to commingling in the stock tanks. Adequate facilities will also be installed to provide monthly well tests for each well on each lease.

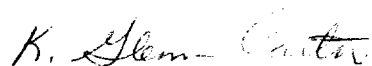

Hydrocarbon production will be accurately measured and determined in accordance with the applicable provisions of the Division "Manual for the Installation and Operation of Commingling Facilities."

The ownership is not common on the two leases. However, only a very small ORRI is not common. All working interest owners, royalty owners, overriding royalty owners, and the purchasers have been notified by registered mail. All parties have consented in writing to the commingling of production from the

two leases. See attachments for copies of the registered mail receipts and letters of consent. Also attached is a copy of the Sundry Notice which has been submitted to the BLM requesting approval of the lease commingling.

If additional information is needed, or if I can be of any assistance in expediting this matter, please contact me at (915) 684-0405.

Sincerely,

A handwritten signature in cursive script that reads "K. Glenn Carter".

\* Lotos "C" Federal No. 901 is a new well which is currently being competed.

The proposed operation is described in detail on the attached diagrams.

continued ...

Continued:

A map is enclosed showing the lease numbers and location of all leases and wells that will contribute production to the proposed commingling/common storage facility. No unitized/communitized areas or producing zones/pools will be commingled.

A schematic diagram is also attached which clearly identifies all equipment that will be utilized.

The storage and measuring facility is located at SE-¼, Section 9, T24S, R31E, on lease number NM 29234, Eddy County, New Mexico. BLM will be notified if there is any future change in the facility location.

Details of the proposed method for allocating production to contributing sources is as follows:

Oil, water, and gas production will be separately metered from each lease prior to commingling in the stock tanks. A heater treater will be installed for each lease to separate the oil, water, and gas prior to metering. As necessary, a test separator (or test heater treater) will be installed for each lease to allow accurate well testing on each lease.

The working interest owners, royalty owners, and overriding royalty owners have been notified of the proposal.

The proposed commingling of production is in the interest of conservation and will not result in reduced royalty or improper measurement of production.

The proposed commingling is necessary for continued operation of the above-referenced Federal leases.

We understand that the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. And, we will submit, within thirty (30) days, an application for right-of-way approval to the BLM's Realty Section in your office if we have not already done so.

Additional well(s) will require additional commingling approvals.

Dear Gentlemen:

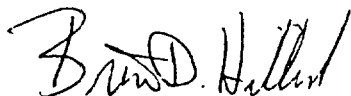

Pursuant to Rule 309-B of The State of New Mexico Energy and Mine  
Division Rules and Regulations, Sonat proposes to Surface Commingle the Delaware production from two  
(2) separate leases (captioned above) at a collection point referred to as the "Lotos Federal No. 4 Battery".  
The commingling of this production will be accurately measured from each lease, prior to the commingling  
thereof, in accordance the Rules and Regulations of the Oil Conservation District. Sonat expects the  
commingling of the Delaware production from the leases to reduce the overall costs of equipping wells  
drilled thereon.

Rule 309-B requires that all royalty, overriding royalty, working interest ownership, interests in production  
and purchasers of the commingled production consent in writing to the commingling of the Delaware  
production. Please indicate your position in this matter by checking the appropriate space provided below.  
Sonat is in the process of completing a well, situated on the Federal Lease No. NM-63757, known as our  
Lotos "C" Federal Well No. 901. In light of this, your timely response will be greatly appreciated. Please  
return your response to us in the self-addressed stamped envelope enclosed herewith. You may fax your  
response to us at 915-684-0444. *(Should you fax your response, please be sure to mail the original to the  
letterhead address.)*

We appreciate your consideration in this matter. Should you have any questions concerning this matter,  
please feel free to contact me at 915-684-0416. We wish to remain,
