OIL CONSERVATION DIVISION

February 12, 1996

McDonnold Operating, Inc. 505 North Big Spring, Suite 204 Midland, Texas 79701-4347

Attn: Mr. Craig McDonnold

RE: Injection Pressure Increase Cline Federal (SWD) Well No.4-K, Lea County, New Mexico

Dear Mr. McDonnold:

Reference is made to your request dated January 12, 1996 to increase the surface injection pressure on the above referenced well. This request is based on a step rate test conducted on January 9, 1996. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on this well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well:

Well and Location	Maximum Surface Injection Pressure
Cline Federal Well No.4-K	1175 PSIG
Located in Section 15, Township 23 South, Range 37 East, Lea County, New Mexico.	

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

William J. I Director
