Re: Request to Substitute Tubing Size - Division Order SWD-696.

Dear Mr. Lee,

My staff has reviewed your request to substitute 2-7/8 inch tubing for the 2-3/8 inch as specified in the above referenced Division Order. Providing that all other conditions contained in the order remain the same, it appears this modification will have no adverse effects on the operation or formations adjacent to the injection interval.

You are hereby authorized to make such modification to the well completion, and the same shall be incorporated as part of Division Order SWD-696.

All other provisions and conditions of SWD-696 and Division Rules 706 and 1120 shall remain in full force and effect.

Sincerely,

Lori Wrotenbery
Director

RE: Injection Permit # 696
Nadel & Gussman Permian, LLC
State HH #12
Section 36, T-19-S, R-32-E
Lea County, New Mexico

Dear Mr. Stone:

On behalf of Nadel & Gussman Permian, LLC, I recently submitted a C-108 to convert the State HH #12 to a saltwater injection well. Approval of the C-108 was granted and Permit #696 was issued.

In the original C-108 the injection tubing was to be 2 3/8" plastic coated tubing. We would now prefer using 2 7/8" cement or plastic lined tubing. The reasons for this requested change are:

1. The larger tubing will have less friction and result future power cost savings.
2. Nadel & Gussman currently have some 2 7/8" tubing in stock.
3. Larger tubing will allow greater daily rates to be injected if the injection horizon will accommodate the volumes.

I would appreciate your review of this proposed change. If you need any additional data please call.

Sincerely,

A handwritten signature in cursive script that reads "Robert Lee".
