Re: Request Amendment to  
Administrative Order PC-394  
Grizzell "B" Battery

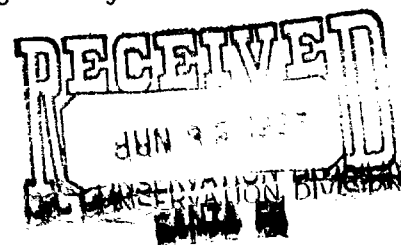

State of New Mexico  
Energy and Minerals Department  
Oil Conservation Division  
P. O. Box 2088  
Santa Fe, NM 87501

Attention: R. L. Stamets  
Division Director

This is a request to amend Administrative Order PC-394 to place the requirement for separate metering of the Grizzell "B" No. 3 in abeyance. This requirement was enacted because Well No. 3 was a non-marginal producer. However, in the past months production has become marginal and we do not foresee any possibility of restoring top allowable.

Grizzell "B" No. 3 is located 1830' FNL x 510' FEL, Section 8, T-22-S, R-37-E, Lea County, New Mexico. It is completed in the Brunson Fusselman Pool with a field top allowable of 187 BOPD. The average daily production of this well thus far in 1986 is as follows:

<u>Month</u>	<u>BOPD</u>
January	180
February	188
March	188
April	164
May	127

The removal of the separate metering facility would reduce lease and maintenance expenses such as monthly provings of this meter.

---

Allocation of production into this commingled battery will be based on well tests.

Your consideration of this request will be appreciated. If you have any questions, contact C. M. Herring at (505) 393-1781, Extension 252.
