Attention: Mr. A. L. Porter, Jr. Re: Continental Oil Company
Application for 160-acre
NSP unit for its Meyer
B-23 No. 3 in Section 23,
Township 22, Range 36,
Jalmat Pool, Lea County,
New Mexico

Gentlemen:

Continental Oil Company respectfully requests administrative approval under the provisions of Rule 5 (b) of the Special Rules and Regulations for the Jalmat gas pool of Order No. R-520 for approval of a 160-acre non-standard gas proration unit for its Meyer B-23 No. 3 well located 1980 feet from the north line and 660 feet from the west line of Section 23, Township 22 South, Range 36 East, Lea County, New Mexico in the Jalmat gas pool.

The unit is proposed to consist of the S/2 N/2 of Section 23, Township 22 South, Range 36 East.

In support of this request we should like to point out that the proposed unit conforms with the requirements of said Rule 5 (b) in all respects as follows:

1. Said unit consists of contiguous quarter-quarter sections (and/or lots).
2. Said unit lies wholly within a single governmental section.
3. The entire proposed unit may be reasonably presumed to be productive of gas.
4. The length or width of said unit does not exceed 5,280 feet.
5. Copies of this application have been furnished this date by registered mail to all offset operators and all operators within 1,500 feet of said well, as required by the provisions of said Rule 5 (b).

A plat is attached hereto showing to the best of our knowledge and belief the proposed unit, the location of the well, and the offset ownership.

In view of the facts set out herein it is respectfully requested that the Commission enter an order approving the non-standard gas proration unit for Continental Oil Company's

Meyer B-23 No. 3 well as described above.

R. L. Adams
Division Superintendent
of Production
New Mexico Division

STATE OF NEW MEXICO }
COUNTY OF CHAVES } ss

R. L. Adams, upon being duly sworn, deposes and says that he is the Division Superintendent of Production for Continental Oil Company, and as such is authorized to file the foregoing application, that he has read said application and knows the contents thereof, and that the statements made therein are true, as he is credibly informed and believes.

Subscribed and sworn to before me this 31st day of July,
1957.

Attention: Mr. A. L. Porter, Jr.

Gentlemen:

In re: Continental Oil Company application for 160-acre
non-standard proration unit for its Meyer B-23
#1 Well and Meyer B-23 #3 Well, Section 23, Town-
ship 22, Range 36, Jalamat Pool, Lea County, New
Mexico.

Sun Oil Company has been advised of Continental Oil Company's application to
reduce the size of its proration unit for its Meyer B-23 #1 Well from 320-
acres to 160-acres so that it can form another 160-acre unit for its Meyer
B-23 #3 Well. Sun Oil Company, as an offset operator, objects to this
application for the following reasons:

1. Applicant does not have a permit to complete a well in the
Jalamat Pool since its permit for Meyer B-23 #3 Well was
received for the purpose of drilling a well to the Seven
Rivers-Queen formation for oil production from the South
Gunite Field.
2. Applicant could not have received a permit for this well
at its present location on the same quarter section as the
Meyer B-23 #1 Well in the Jalamat Pool.
3. If this application is granted applicant will have two gas
wells offsetting Sun's H. S. Record well on the same quarter
section, and each of applicant's wells will have 160-acres
assigned to it.
4. Applicant should not be permitted to reduce the size of its
units merely for the purpose of accommodating wells that
it has in the area.
5. Sun Oil Company feels that in the future, by reason of the
location of these wells, if applicant's request is granted
that Sun will suffer drainage by reason of the location of
two wells offsetting our one well.

Your consideration of this objection will be appreciated.

Very truly yours,

ARB:cmg
