Attention: David Sweeney

*Administrative Order NSL-3251*

Dear Mr. Sweeney:

Reference is made to your application dated April 19, 1993 for a non-standard Allison-Pennsylvanian oil well location for your existing Junction Federal Well No. 1 which was drilled to a total depth of 11,935 feet in February/March, 1993 to test the Devonian formation at a standard oil well location 1650 feet from the South and West lines (Unit K) of Section 17, Township 8 South, Range 37 East, NMPM, Roosevelt County, New Mexico.

It is my understanding that the Devonian zone was recently plugged back and said well was recompleted to the Undesignated Allison-Pennsylvanian Pool, which pursuant to RULE 3 of the Special Rules and Regulations for the Allison-Pennsylvanian Pool as promulgated by Division Order No. R-1389-B, dated August 26, 1959 is unorthodox. Further, the E/2 SW/4 of said Section 17 shall be dedicated to the well forming a standard 80-acre oil spacing and proration unit for said pool.

By the authority granted me under the provisions of Division Memorandum No. 4-86 and the Special Rules and Regulations for the Allison-Pennsylvanian Pool, the above-described unorthodox oil well location is hereby approved.

Sincerely,

A handwritten signature in black ink, appearing to read "William J. LeMay".

William J. LeMay  
Director
