Re: Application for Non-Standard Gas Proration Unit & Unorthodox Location
C. H. Weir "B" #5
Unit G, Sec. 11, T20S, R37E,
Lea County, New Mexico

Dear Mr. Stogner and Mr. Sexton:

Enclosed is a plat containing the proposed 280-acre non-standard gas proration unit for the C. H. Weir "B" #5 as requested by Mr. Stogner by letter dated September 11, 1996. Also shown on this plat is the A. L. Christmas Lease which contained one Eumont gas well which has not produced since October 1993, and the Skaggs "B" Lease which contains one active Eumont gas well. Not shown on this plat is Conoco's SEMU Eumont lease comprising all of Section 14 except Unit A. This lease contains two active Eumont gas wells located in Units L and N.

The SE/4 of Section 11 was previously a Eumont Gas Pool non-standard proration unit created by Administrative Order NSP-553 dated May 11, 1961. This unit contained two Eumont gas wells located in Units I and J, but there has been no Eumont production from this proration unit since June 1974.

The NE/4 NE/4 of Section 11 is not included in this non-standard proration unit because it is included in the East Eumont Unit waterflood. The southern boundary of the East Eumont Unit is outlined in green on the attached offset operator map. If any additional information is required, please contact me at (505) 397-0413.

Sincerely,

Britton M. McQuien
Engineer
Texaco E&P Inc.
