

Estimates of Bypassed Coal

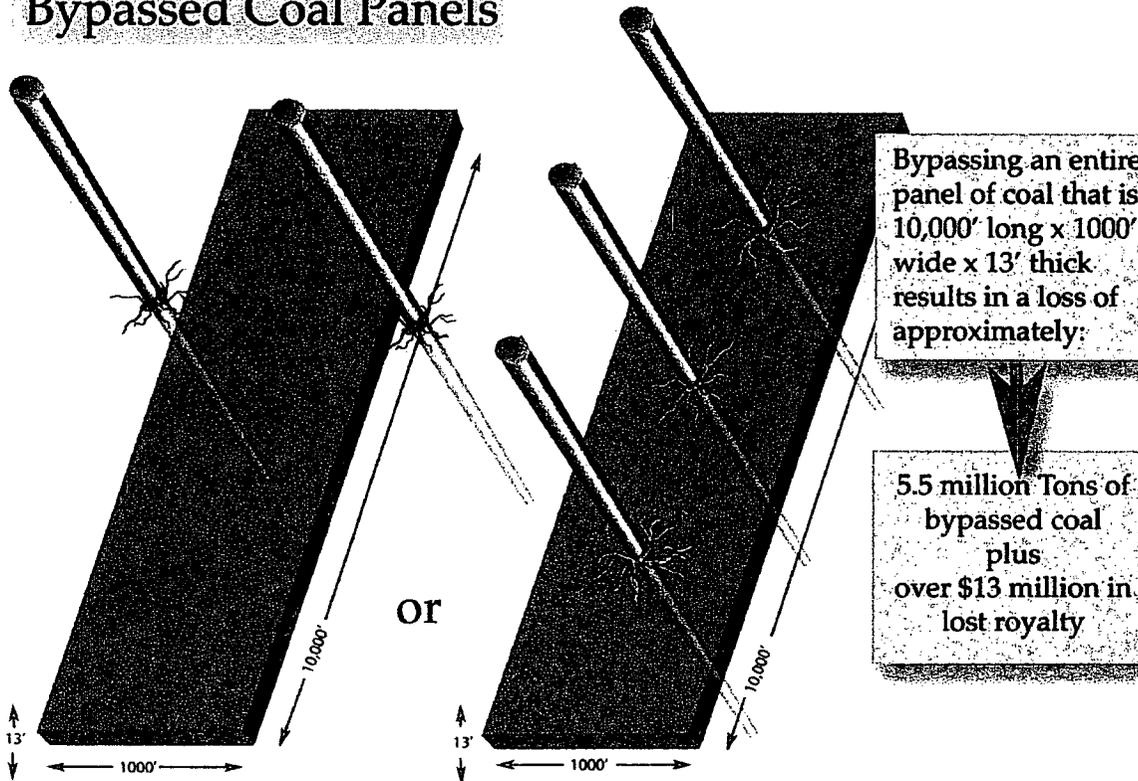

Bypassed Wellbore

Bypassing a block of coal that is 600' long x 1000' wide x 13' thick (surrounding a wellbore) results in a loss of approximately:

333,000 Tons of bypassed coal plus \$800,000 in lost royalty plus approximately 30 days, at substantial cost, to move the long wall apparatus

Bypassed Coal Panels

Bypassing an entire panel of coal that is 10,000' long x 1000' wide x 13' thick results in a loss of approximately:

5.5 million Tons of bypassed coal plus over \$13 million in lost royalty

Wells in gate roads
