Subject: Case 15071 - Application of Hunt Oil Company for approval of a non-standard proration unit and non-standard locations, Rio Arriba Count NM

Good afternoon Phillip

This attempt by Hunt Oil Company to form two 960-acre project areas for horizontal wells in a pool spaced on 640 acres has a long history. It was filed as an administrative NSP/NSL application, and set for hearing due to a protest. It is set on the 12/19 docket.

The protest has been formally withdrawn.

Although Rule 19.15.15.11.B(2) is unbearably complicated, I believe that it allows approval of two non-standard 320-acre half-section units within a section in a pool spaced on 640 by administrative order.

Accordingly, in Richard's absence I am making an executive decision.

I have prepared an order dismissing the hearing application, and will give you the file with the a draft of the dismissal order.

Please process this as an administrative NSP/NSL application.

Sincerely

David
