Subject: Well Proposal Follow Up--NE/4 Section 17, T29N, R14W
Attachments: DOC040213.pdf

To Whom it may Concern:

I am the Landman for XTO Energy Inc. and I found your contact information on the New Mexico Department of Transportation website. XTO Energy Inc. (XTO) recently proposed the drilling and completion of the Ropco 16-1H well as a single lateral horizontal testing the Mancos formation by letter dated March 11, 2013. Please see attached.

This email serves as a follow up to that letter dated March 11, 2013 and request your expedited response. If you do not wish to participate in the well, you have the option to lease your minerals by signing the lease attached to the letter. Our records show that the New Mexico Highway and Transportation Department owns a .95 acre tract in the NE/4 of section 17 of T29N, R14W.

Please let me know if you have any questions. I can be reached at 817-885-1130.

Thanks,

Cy Zimmerman
