Subject: 15690 and 15691: Pool and pool code

Mike,

You asked me yesterday to follow up on the pool code for Case Nos. 15690 and 15691. The well for 15690 has been sundried from a Bone Spring to Wolfcamp pool, and assigned to pool code 98230. The well for 15691 has been sundried to the Wolfcamp also, but the pool has not yet been updated on the Division website. Since it is less than a mile away from the other well, they will be in the same pool.
