Re: Case No. 16105: Amended Application of LOGOS Operating, LLC for Approval of a Non-Standard Project Area Comprised of Acreage Subject to a Proposed Federal/State of New Mexico Communitization Agreement, San Juan County, New Mexico

Gentlemen:

At the May 4, 2018 Examiner hearing on the referenced Application, Mr. Jay Paul McWilliams discussed the area type-log (Ex. 6) which depicts the Gallup horizontal target for the planned development within the communitized area. In the course of his testimony, Mr. McWilliams made reference to the prolific NEBU 602 Com 1H well drilled by BP in 2017 and indicated that the landing zone for that well was the El Vado C which correlates on the type-log. The APD for the BP well identifies the El Vado C, but in fact the well was landed in the El Vado A.

On behalf of LOGOS, we simply wish to have the record be accurate in this regard.

Very truly yours,

J. Scott Hall
