Mike,

I have confirmed with Apache that they are requesting the NSLs because Apache would like to perf closer the section lines to minimize unstimulated reservoir thereby reducing waste.

Thanks,
Jennifer

Mike,

I am confirming the reasons why NSLs are needed with Apache, but am confident that they are seeking NSLs in order to increase reserves from areas that would not be developed with the standard setbacks. Attached are e-mailed exhibits and I have copied Leonard.

Thanks!
Jennifer

Subject: Apache Cases 16142 and 16143

Jennifer:

First, e-mail non-contested exhibits to Leonard

Next, I need a reason for the NSL portions of the application-is it because Apache is seeking to increase oil and gas reserves that would not be developed with the standard set-backs.

Please tell the lady you worked with that I did not mean to insult her when I laughed about her comment about protecting waste-it is a standard joke in the Division and everyone gets a laugh at it when anyone says that

Thanks

Mike
