I forgot one thing you are all wrong on pool names

Urssey Tank; Seven Rivers, North Pool would be Urssey Tank;Seven Rivers, North with no space after the semicolon.

Paul

**Subject:** FW: Case 16278

I'm at the office and I wish I was at home resting. I'm still waiting on a phone call. Not any fun.

When ONGARD went active we found out that date on the pool, property codes and production dates created major headaches. For example you could not enter production with a date earlier than the pool or property. This was found out when we tried to combine pools with different dates. It was decided to create all properties and pools 01/01/1900.

Michael,

Thanks for the draft, I am noting a couple of things on the hard copy draft and will put in your office. You did a great job on this – maybe you could be a district geologist if you ever get tired of torturing Jim Bruce and Jennifer Bradfute.

I believe we create pools as of 1/1/1900 but the effective date does an effect, haha!

The back dating of a Pool's effective date causes them to go back and correct production reports.  
Not sure what else?

Assuming Paul is in Lubbock or resting at home.

Karen and Amy, would you let us know about "effective dates" of a pool?

Will

Jim:

If I read 19.15.2016 C(4) correctly, the OCD will require well log cross-section. I did not see this in the **XiBits**  
But I am unsure if this conflicts with 19.15.2016 C(3).  
E-mail us your opinion

Jim:  
I need you to check the pool designation for Case 16278-It does not appear to follow the Paul Kautz nomenclature. You listed the pool as North Urssey Tank-Yates Seven Rivers Pool. Normally Paul would have this name as:  
Urssey Tank; Seven Rivers, North Pool.

Well Name: State 26 Well No. 1: API 30-025-41431
