I talked to Will, and I think if you want new horizontal well rules, provide an Affidavit to that effect.

Jim:

The Featherstone; Bone Spring has special pool rules-80-acre spacing and proration units and wells located no closer than 150-feet from the center of the quarter-quarter section. Therefore, based on the dedicated pool the location is unorthodox

However, your application was submitted on August 7, 2018.

Therefore, are you in reality asking for six quarter-quarter sections based on 19.15.16.15 (B) NMAC- which alleviated NSL concern

Is this overkill?

I am including David Brooks in the e-mail because I want to make sure about this-it will come up again.

Jim:

I simply did this because it is a standard practice at Hearing.

Your first and last take points are orthodox, based on the geologic testimony of proposed drilling program.

I do not see the point see the point of revised C-102 for the Case file, only submit it to Hobbs.

Mike

Mike: Attached are the C-102s for Cases 16391 and 16392. C-102s were presented for Cases 16389 and 16390.

The C-102s all show the old setbacks of 330 feet. Mewbourne's plan is to file as-drilled C-102s showing the actual first and last take points, but if you desire revised C-102s now, let me know.

The Pool Code in Cases 16391 and 16392 is 24250 (Featherstone Bone Spring).

As to overhead rates in Cases 16389 and 16390 (\$8000/\$800 requested), the first well drilled in Section 10 had approved rates in the same amount (Case 15888, Order R-14717).
