**Date:** Tuesday, May 21, 2019 7:36:38 AM

---

Section 18 of 18-27 and Section 13 of 18-26 would be in Red Lake Glorietta- Yeso.  
Top Glorietta in Well in Section 13 shows Glorietta at 2420 , Yeas 2660 and Abo around 5020. So  
Target for Yeso of 3400 is possible.

**Subject:** Percussion Cases 20233 and 20228

Hello Mike,  
These are drafted but first...

Would you please ask Percussion to send another affidavit in each Case with:

- A. New proposed C-102 for each of these wells with any additional data they now have including corrected Ranges (the Range numbers in the exhibits did not match the application).
- B. Clarification on TVD. Proposal letter depth was much shallower than the Geologists depth. I could assume 3400 feet is correct, but should ask for clarification.
- C. Clarification on the Pool name - if Percussion could obtain it from Ray Podany in Artesia. If not, I will go with the one in these drafts.

Thank You Much,  
Will
