EXAMINER HEARING JUNE 13, 2019**

CASE NO. 20558

YAZ 28 SWD No. 1 WELL

LEA COUNTY, NEW MEXICO

GOODNIGHT
MIDSTREAM

BEFORE THE OIL CONSERVATION DIVISION

Santa Fe, New Mexico

Exhibit No. A

Case No. 20558

Submitted by: GOODNIGHT MIDSTREAM

Hearing Date: June 13, 2019

Company Overview

June 2019

Goodnight Overview

The most reliable produced water gathering and disposal company in the Permian and Bakken.

- Founded in 2011 to provide long-term produced water solutions to oil and gas operators
- Handle over 450,000 BWPD with 2/3 of that volume received by pipeline
- Own and operate more than 50 SWDs and 450 miles of water-gathering and transmission lines with additional facilities and pipelines currently under construction
- 99%+ pipeline uptime
- Executed and delivered on long-term contracts with fifteen major producers
- Maintain excellent landowner relationships
- Over 160 employees
- Safety in construction and operations is our number one priority

Llano System Overview

Key Points

- Goodnight's Llano system is comprised of 47 miles of pipeline with 400 MBw/d of throughput capacity and three existing SWDs
- Llano system transports produced water from the central Delaware Basin to Goodnight's saltwater disposal well system on the Central Basin Platform ("CBP") in the Eunice area. The Llano system utilizes the depleted oil fields on the CBP as a superior geologic alternative for sustainable disposal of produced water into multiple formations
- The Llano system receives volumes from > 200,000 gross dedicated acres
- Offset operators are targeting high porosity and permeable Bone Spring sand targets with great success
- Marine sandstones in the Bone Spring are capable of producing very high initial rates and fluid volumes
- Offset operators include Ameradev, EOG, Conoco, Devon, Marathon, Matador, Centennial, Oxy and XTO

ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND
 REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Applicant: Goodnight Midstream Permian, LLC **OGRID Number:** 372311
Well Name: YAZ 28 SWD 1 **API:** 30-025-
Pool: SWD; San Andres-Glorieta **Pool Code:** 96127

**SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION
 INDICATED BELOW**

- 1) **TYPE OF APPLICATION:** Check those which apply for [A]
 A. Location – Spacing Unit – Simultaneous Dedication
☐ NSL ☐ NSP (PROJECT AREA) ☐ NSP (PRORATION UNIT) ☐ SD
 B. Check one only for [I] or [II]
 [I] Commingling – Storage – Measurement
☐ DHC ☐ CTB ☐ PLC ☐ PC ☐ OLS ☐ OLM
 [II] Injection – Disposal – Pressure Increase – Enhanced Oil Recovery
☐ WFX ☐ PMX ☒ SWD ☐ IPI ☐ EOR ☐ PPR

- 2) **NOTIFICATION REQUIRED TO:** Check those which apply.
 A. ☒ Offset operators or lease holders
 B. ☐ Royalty, overriding royalty owners, revenue owners
 C. ☒ Application requires published notice
 D. ☒ Notification and/or concurrent approval by SLO
 E. ☒ Notification and/or concurrent approval by BLM
 F. ☒ Surface owner
 G. ☒ For all of the above, proof of notification or publication is attached, and/or,
 H. ☐ No notice required

FOR OCD ONLY

- ☐ Notice Complete
☐ Application
 Content
 Complete

- 3) **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

 Case No. 20558
 Submitted by: GOODNIGHT MIDSTREAM
 Hearing Date: June 13, 2019

EXHIBIT A

APPLICATION FOR AUTHORIZATION TO INJECT

- I. PURPOSE: Secondary Recovery Pressure Maintenance ☒ Disposal Storage
Application qualifies for administrative approval? ☒ Yes No
- II. OPERATOR: **Goodnight Midstream Permian, LLC** (OGRID 372311)
ADDRESS: **5910 N Central Expressway, Suite 850 Dallas, TX 75206**
CONTACT PARTY: **Agent: Midcon Resource Group, LLC - Thomas Schumacher** PHONE: **(701) 400-9909**
Agent Email: tom@midcongroup.com
- III. WELL DATA: Complete the data required on the reverse side of this form for each well proposed for injection.
Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? Yes ☒ No
If yes, give the Division order number authorizing the project: _____
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water; and,
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geologic data on the injection zone including appropriate lithologic detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- *X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted).
- *XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
- NAME: **Rich Rehm** TITLE: **COO**
SIGNATURE:  DATE: **3/10/19**
E-MAIL ADDRESS: **rrehm@goodnightmidstream.com**
- * If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstances of the earlier submittal: _____

APPLICATION FOR AUTHORIZATION TO INJECT

YAZ 28 SWD #1 – API# 30-025-XXXXX
230' FNL & 236' FEL, Unit A of Sec 28-T21S-R36E
Lea County, New Mexico

- I. **PURPOSE:** The purpose of this application is to gain approval to drill and complete the YAZ 28 SWD #1 well within the middle/lower San Andres and Glorieta formations. This application DOES qualify for administrative approval.
- II. **OPERATOR:** Goodnight Midstream Permian, LLC (OGRID 372311)
ADDRESS: 5910 N Central Expressway, Suite 850 Dallas, TX 75206 **OPERATOR PHONE:** (214) 891-2039
AGENT: Midcon Resource Group, LLC – Thomas Schumacher
AGENT PHONE: (701) 400-9909 **AGENT EMAIL:** tom@midcongroup.com
- III. **WELL DATA:** Well data for this application is listed below and detailed on the Proposed Wellbore Schematic that is included as Attachment III-1.
- A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:
- (1) **LEASE NAME:** YAZ 28 SWD **LEASE TYPE:** Fee
WELL NAME & NO.: YAZ 28 SWD #1
LOCATION: 230' FNL & 236' FEL, Unit A of Sec 28-T21S-R36E
 - (2) **SURFACE CASING:** The 9.625" 40# J-55 will be set to 1,500' in 12.25" hole and cemented with 850 sacks of cement circulated to surface.
PRODUCTION CASING: The 7" 26# J-55 production casing will be set to 6,200' in an 8.75" hole and cemented with 1650 sacks of cement circulated to surface and confirmed with CBL.
 - (3) **TUBING:** 4.5" 11.6# L-80, LT&C fiberglass-lined steel tubing will be set to ~4,600'.
 - (4) **PACKER:** 7" Arrowset 1-X stainless packer will be set to ~4,600'.
- B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well.
- (1) **INJECTION FORMATION:** SWD; San Andres-Glorieta (96127)
 - (2) **INJECTION INTERVAL:** This application is proposing to perforate the middle/lower San Andres and Glorieta intervals from 4630' - 6100'.
 - (3) **WELL'S ORIGINAL PURPOSE:** The well will be drilled as a saltwater disposal well.
 - (4) **CURRENT PERFORATED INTERVAL STATUS:** Well has not yet been drilled.
 - (5) **NEXT HIGHER OIL/GAS ZONE:** Eumont; Yates - Seven Rivers - Queen Pool. The LOCKHART B 28 6 well (API# 30-025-04814) is approximately 600' from the proposed YAZ 28 SWD 1 and produces from this pool at a perforated interval of 3123'-3900'.
- NEXT LOWER OIL/GAS ZONE:** None

- IV. EXPANSION PROJECT STATUS: This is not an expansion of an existing project. It is a request to complete the proposed YAZ 28 SWD #1 within the middle/lower San Andres and Glorieta intervals from 4630' - 6100'.
- V. AREA OF REVIEW MAPS: Maps that identify leases and wells within two miles of the proposed YAZ 28 SWD #1 with finer detail inset maps showing the well's one-half mile area of review (AOR) are included as Attachments V-1 and V-2. Additionally, Attachment V-3 is a historic plat that maps the tracts within the AOR and Attachment V-4 details their lessor, lease, lessee of record and operators.

*VI. DATA ON WELLS IN AOR: There are 13 existing vertical wells within the one-half mile AOR consisting of 7 producers and 6 P&A wells. One well, the LOCKHART B 28 6 (API# 30-025-04814), does not appear on the OCD GIS platform but has been added to the inset map of the previous Attachment V-2. A tabulation of data of public record for these wells is included as Attachment VI-1. It includes each well's type, status, pool, construction, location, GL, and TVD. Detailed wellbore illustrations are not required as none of these wells penetrate the proposed injection interval of 4630'-6100' or even the top of the San Andres Formation estimated to be at 4390'.

EXHIBIT A

VII. OPERATIONAL DATA

- (1) PROPOSED AVERAGE & MAXIMUM DAILY RATE: Average Daily Rate ~15,000 bpd/Maximum Daily Rate - Limited by MIP (926 psi) only.
- (2) SYSTEM OPEN/CLOSED: System will be closed. Goodnight Midstream Permian, LLC is building a several dozen mile gathering system across multiple townships.
- (3) PROPOSED AVERAGE & MAXIMUM INJECTION PRESSURE: Average Injection Pressure will be ~750 psi. Maximum Injection Pressure will be 926 psi based on the proposed depth to top perf.
(0.2 psi/foot X 4630' = 926 psi)
- (4) INJECTION FLUID ANALYSIS: Injection fluid will be produced water from Permian Basin wells including Yates, Seven Rivers, Queen, Grayburg, San Andres, Delaware, Blinbry, Drinkard, Tubb, Bone Spring, Wolfcamp, Strawn, Pennsylvanian, and Morrow. Attachment VII-4.1 details water analysis data from the NM Produced Water Quality Database V.2 of many of these zones from nearby wells in Township 21S, Range 37E. Attachment VII-4.2 details produced water samples from wells in other townships and Attachment VII-4.3 is a recent analysis of typical produced water that is currently being disposed through Goodnight's pipeline/disposal system in this area.

COMPATABILITY – EOG's RED HAT STATE SWD #001 (API# 30-025-31110) is a similar SWD; San Andres-Glorieta disposal well in Lea County. A total of 2,253,905 barrels have been disposed through this well with no reported problems.
- (5) DISPOSAL ZONE DATA: There have been 18 oil/injection wells permitted in the Eunice Monument, Grayburg-San Andres Pool within one mile of the proposed location. A tabulation of data that includes each well's ground elevation and true vertical depth is included as Attachment VII-5.1. None of these wells have penetrated the proposed injection zone. Additionally, no Glorieta wells are located within one mile of this proposed location.

Formation water was swabbed during the original completion of the neighboring TED 28 SWD 1, analyzed, and results submitted to the OCD. Those results are included as Attachment VII-5.2

Produced Water Samples from Township 21S, Range 37E - Attachment VII-4.1 (3 pages)

EXHIBIT A

*VIII. APPROPRIATE GEOLOGIC DATA: The red beds are the nearest underground source of drinking water above the proposed disposal interval. They are 355' deep in the FELTON #003 well (API# 30-025-28255) that is approximately 3600' west-southwest of the YAZ 28 SWD #001. Attachment VIII-1 is a NM State Engineer report that details the nearest recorded freshwater well to be 4430' northeast and an additional eleven wells within two miles. The deepest wells is 305'. No underground sources of drinking water are below the proposed disposal interval.

Estimated formation tops at the proposed YAZ 28 SWD 1 location are as follows:

Rustler Anhydrite – 1470'
Yates – 2990'
Seven Rivers – 3245'
Queen – 3580'
Penrose – 3705'
Grayburg = 3850'
San Andres = 4390'
Glorieta = 5735'
Leonard = 6340'

There is approximately 2,900' of vertical separation and more than a thousand feet of anhydrite and salt between the bottom of the only likely underground water source (red beds) and the top of the San Andres. Additionally, the Ogallala aquifer is approximately 6 miles north of this proposed well as detailed in Attachment VIII-2.

Geologic Discussion of Confining and Injection Zones

Reference well: TED 28 SWD 1, API# 30-025-44386 Lot F of Section 28-T21S-R36E.

At this location, the primary upper confining zone is a 70 feet thick San Andres interval of tite dolomite and anhydrite. It is expected to be located at a depth of approximately 4560' to 4630'. Additionally, the top 60' of the San Andres is dominantly anhydrite. These intervals both make effective permeability barriers.

The middle/lower San Andres injection intervals are expected at approximately 4630' to 4945' and to be composed of porous dolomite ranging from 8% porosity up to 15% with excellent fluid transmissivity properties. The Glorieta injection interval is expected at approximately 5700' to 6100'.

Located below these porous zones at approximately 6340' is the Leonard interval composed of non-reservoir tite dolomite and anhydrite with no porosity. This will make an excellent lower confining zone.

A cross-section detailing appropriate geologic data of the confining zones and the San Andres – Glorieta injection zone is included as Attachment VIII-3. It describes lithologic detail, geologic name, thickness, and depth.

RE: Goodnight Midstream, LLC Yaz SWD well permit

Lot A, Section 28, Township 21S Range 36E
Lea County, New Mexico

Goodnight Midstream conducted a hydrogeologic investigation related to the proposed injection well. The scope of the investigation was to determine if there is any hydrologic connection between the proposed injection interval and any sources of underground drinking water.

Goodnight geologist performed an analysis of subsurface well log data. It is our conclusion that there is no evidence of faulting in the data we evaluated at the depths that are being considered. There are small scale flexures which may or may not be associated with small scale faults. None of these flexures extend above the Wolfcamp unconformity and are not seen in the Leonard intervals.

Goodnight acquired and evaluated 3D seismic covering the lands that this salt water disposal well is located upon. This data shows the geologic setting in the area. No faults are seen in the Artesia Group, San Andres, Glorieta, or Leonard series.

We see no evidence of faulting that would extend to or form a connection between the injection zone and any underground sources of drinking water.

A handwritten signature in blue ink that reads 'Steve Drake'.

XIII. PROPER NOTICE:

A thorough lease and mineral ownership investigation was performed upon all private tracts within the AOR by MLT Land Services, LLC. Their findings are included as Attachment XIII-1.

All operators and lessees of record within the tracts of the area of review have been accounted for and were previously detailed on Attachment V-4. It should be noted that Intents to P&A both wells found within the Felton tract were approved by the NMOCD on 1/10/2019. Therefore, leases within this tract may no longer be valid and Goodnight Midstream Permian, LLC is compelled to notify the mineral owners within this tract as affected parties.

The surface owner for the YAZ 28 SWD 1 site is the Dasco Cattle Co, LLC. Contact information for all operators, lessees, surface and mineral owners is included as Attachment XIII-2. A copy of the C-108 and proper notice of application for disposal into the middle/lower San Andres & Glorieta (4,630'– 6,100') was given via letter to all parties listed. A copy of a typical letter and certified mail receipts are included as Attachment XIII-3 & XIII-4 as "proof of notice".

A legal notice was also published in the Hubb News-Sun. A proof copy of the published notice is included as Attachment XIII-5.

XIV. CERTIFICATION: See certification on original C-108

RE: YAZ SWD Well – E/2 NW/4 and S/2 NE/4 and the SE/4 of Section 28 T21S R36E Lea County, NM

**Tom Schumacher
MidCon Resource Group, LLC
701-400-9909**

Dear Mr. Schumacher,

The only active leases for the tract of land cited above are for the Felton #1 – API # 30-025-04807 and the Felton #4 – API # 30-025-32699 wells. These are included in the Eumont Gas Pool as a Non-Standard Gas Proration Unit and the entire 160 acres of the E/2 NW/4 and the S/2 NE/4 of Section 28, T21S R36E are included in the pool. These wells were drilled through the Queen Formation to a depth of approximately 3900 feet and the producing zone of these wells are in the Queen formation with producing zones from about the 3,209 foot depth to the 3,830 foot depth. Neither of these wells are producing in the proposed Yaz SWD Well zone. According to the State of New Mexico Records for these wells, the operator, Oxy USA WTP, Limited Partnership applied to plug and abandon these wells on January 10, 2019.

Therefore, since the above cited leases on the subject property will expire and no other leases are active or pending on the property, we ran mineral ownership for those tracts forward from the list of mineral owners which was compiled in December of 2015. This should be a complete list of the current ownership which could be compiled from a search of the Lea County, NM records.

Since final plug and abandon information is not currently on the State of New Mexico website, it is my opinion that the operator of the above cited wells should be notified of the proposed SWD well, along with all of the mineral owners of the tract. It is my understanding that this has been done and should meet the requirements of the State of New Mexico.

The SE/4 of Section 28 T21S R36E has all the minerals held by production by the S E Felton #001, S E Felton #002 and the Felton #005 wells. The entire 160 acres of the SE/4 are included in the Eumont Gas Pool. There were no depth severances for the leases on these wells, so the mineral ownership is held by production with these producing wells which are operated by Penroc Oil Corp.

Sincerely yours,

Thomas A. Sewall
Senior Right-of-Way Agent and Landman

NOTIFICATION TO INTERESTED PARTIES

Via U.S. Certified Mail – Return Receipt Requested

To whom it may concern:

This letter is to advise you that Goodnight Midstream Permian, LLC, 5910 N Central Expressway Suite 850, Dallas, TX 75206 is applying for authorization to inject into the San Andres and Glorieta Formations at the YAZ 28 SWD #001. The attached Form C-108 is being filed with the New Mexico Oil Conservation Division in Santa Fe, NM and is included with this letter as part of the application process.

The YAZ 28 SWD #001 will be located at 230' FNL and 236' FEL, Unit A of Section 28, T21S, R36E, Lea County, New Mexico which is approximately three miles south of Oil Center, New Mexico. Produced water from area oil & gas production will be commercially disposed into the San Andres and Glorieta Formations at a proposed interval depth of 4,630' to 6,100', at a maximum surface pressure of 926 psi, and a rate limited only by such pressure.

This letter is a notice only. No action is needed unless you have questions or objections. You are entitled to a full copy of this application. For general inquiries or to receive a PDF file copy of the complete application, you may call the applicant's agent, MidCon Resource Group, LLC, at (701) 400-9909 or email tom@midcongroup.com.

Interested parties wishing to object to the application or request a hearing must file with the New Mexico Oil Conservation Division at 1220 South St. Francis Dr., Santa Fe, NM 87505 within fifteen days.

Sincerely,

Thomas Schumacher
MidCon Resource Group, LLC
Agent for Goodnight Midstream Permian, LLC

LEGALS

LEGAL NOTICE
APRIL 12, 2019

Notice is hereby given of the application by Goodnight Midstream Permian, LLC, 5910 N Central Expressway Suite 850, Dallas, TX 75206 for authorization to inject into the San Andres and Glorieta formations at the proposed YAZ 28 SWD #001 well.

The YAZ 28 SWD #001 will be located at 230' FNL and 236' FEL, Unit A of Section 28, T21S, R36E, Lea County, New Mexico which is approximately three miles south of Oil Center, New Mexico. Produced water from area oil & gas production will be commercially disposed into the San Andres and Glorieta Formations at a proposed interval depth of 4,630' to 6,100', a maximum surface pressure of 926 psi, and a rate limited only by such pressure.

Interested parties wishing to object to the application must file with the New Mexico Oil Conservation Division at 1220 South St. Francis Drive, Santa Fe, NM 87505 within fifteen days. Other inquiries regarding this application should be directed to the applicant's agent, MidCon Resource Group, LLC, at (701) 400-9909 or by email at tom@midcongroup.com. #34006

TO: AFFECTED PARTIES

**Re: Application of Goodnight Midstream Permian, LLC for Approval of a Salt Water Disposal Well, Eddy County, New Mexico.
Yaz 28 SWD No. 1 Well**

Ladies & Gentlemen:

This letter is to advise you that Goodnight Midstream Permian, LLC has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 13, 2019 and the status of the hearing can be monitored through the Division's website at <http://www.emnrd.state.nm.us/ocd/>. Division hearings will commence at 8:15 a.m. in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B to file a Pre-hearing Statement four business days in advance of a scheduled hearing. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: the names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter please contact Thomas Schumacher, MidCon Resource Group, LLC, at (701) 400-9909 or tom@midcongroup.com.

Sincerely,

Adam G. Rankin
