APPLICATION OF MATADOR  
PRODUCTION COMPANY FOR  
COMPULSORY POOLING,  
EDDY COUNTY, NEW MEXICO.

CASE NOS. 20904,20905,20906,20907,  
20908, 20909, 20910, and 20911

AFFIDAVIT OF SAM PRYOR

Sam Pryor, of lawful age and being first duly sworn, declares as follows:

1. My name is Sam Pryor. I work for MRC Energy Company, an affiliate of Matador Production Company (“Matador”), as an Area Land Manager.

2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of record.

3. I am familiar with the applications filed by Matador in this case, and I am familiar with the status of the lands in the subject area.

4. In these consolidated cases, Matador is seeking an Order pooling all uncommitted interests in the following standard horizontal spacing units underlying Sections 21 and 22, Township 20 South, Range 29 East, NMPM, Eddy County, New Mexico:

- In **Case No. 20904**, a 320-acre, more or less, horizontal spacing unit in the Bone Spring formation comprised of the N/2 N/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #121H**, which will be horizontally drilled from a surface location in the NW/4 NW/4 of Section 21, Township 20 South, Range 29 East to bottom hole location in the NE/4 NE/4 of Section 22.

- In **Case No. 20905**, a 320-acre, more or less, horizontal spacing unit in the Bone Spring formation comprised of the S/2 N/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #122H**, which will be horizontally drilled from a surface location in the NW/4 NW/4 of Section 21, Township 20 South, Range 29 East to bottom hole location in the SE/4 NE/4 of Section 22.
- In **Case No. 20906**, a 320-acre, more or less, horizontal spacing unit in the Bone Spring formation comprised of the N/2 S/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #123H**, which will be horizontally drilled from a surface location in the NE/4 SE/4 of Section 20, Township 20 South, Range 29 East to bottom hole location in the NE/4 SE/4 of Section 22.
- In **Case No. 20907**, a 320-acre, more or less, horizontal spacing unit in the Bone Spring formation comprised of the S/2 S/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #124H**, which will be horizontally drilled from a surface location in the NE/4 SE/4 of Section 20, Township 20 South, Range 29 East to bottom hole location in the SE/4 SE/4 of Section 22.
- In **Case No. 20908**, a 320-acre, more or less, horizontal spacing unit in the Wolfcamp formation comprised of the N/2 N/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #201H**, which will be horizontally drilled from a surface location in the NW/4 NW/4 of Section 21, Township 20 South, Range 29 East to bottom hole location in the NE/4 NE/4 of Section 22.
- In **Case No. 20909**, a 320-acre, more or less, horizontal spacing unit in the Wolfcamp formation comprised of the S/2 N/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #202H**, which will be horizontally drilled from a surface

location in the SE/4 NE/4 of Section 20, Township 20 South, Range 29 East to bottom hole location in the SE/4 NE/4 of Section 22.

- In **Case No. 20910**, a 320-acre, more or less, horizontal spacing unit in the Wolfcamp formation comprised of the N/2 S/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #203H**, which will be horizontally drilled from a surface location in the NE/4 SE/4 of Section 20, Township 20 South, Range 29 East to bottom hole location in the NE/4 SE/4 of Section 22.
- In **Case No. 20911**, a 320-acre, more or less, horizontal spacing unit in the Wolfcamp formation comprised of the S/2 S/2 of Sections 21 and 22 to be dedicated to the proposed **Michael K&B 2122 Fed Com #204H**, which will be horizontally drilled from a surface location in the SE/4 SE/4 of Section 20, Township 20 South, Range 29 East to bottom hole location in the SE/4 SE/4 of Section 22.

5. **Matador Exhibit A-1** contains a draft Form C-102 for each of the eight proposed wells. The land in the proposed spacing units is comprised of federal lease lands. For case numbers **20904-20907**, Matador understands that these wells will be assigned to the Getty; Bone Spring Pool (Pool Code 27470). For case numbers **20908-20911**, Matador understands that these wells will be assigned to the Burton Flat Upper Wolfcamp East (Pool Code 98315).

6. The completed intervals for the proposed wells will remain within the standard offset required by the statewide rules set forth in 19.15.16.15 NMAC.

7. **Matador Exhibit A-2** identifies the tracts of land comprising the proposed horizontal spacing units. The proposed wellbores are marked in blue inside the proposed horizontal spacing units which are outlined in red.

8. **Matador Exhibit A-3** identifies the working interest owners that Matador is seeking to pool along with their respective ownership interest in each of **Case Nos. 20904 and 20908**. The list of pooled parties and their respective interest percentages are the same in each of these two cases.

9. **Matador Exhibit A-4** identifies the working interest owners that Matador is seeking to pool along with their respective ownership interest in each of **Case Nos. 20905, 20906, 20907, 20909, 20910, and 20911**. The list of pooled parties and their respective interest percentages are the same in each of these six cases.

10. In addition, in each case, Matador is also seeking to pool the overriding royalty interest owners.

11. **Matador Exhibit A-5** identifies the overriding royalty interest owners that Matador seeks to pool in **Case Nos. 20904, 20905, 20908 and 20909**.

12. **Matador Exhibit A-6** identifies the overriding royalty interest owners that Matador seeks to pool in **Case Nos. 20906, 20907, 20910 and 20911**.

13. There are no depth severances within the Bone Spring formation for this acreage.

14. There are no depth severances within the Wolfcamp formation for this acreage.

15. **Matador Exhibit A-7** contains sample well proposal letters and AFE sent to working interest owners for each well. The costs reflected in the AFE are consistent with what other operators have incurred for drilling similar horizontal wells in the area.

16. In addition to sending well proposal letters and AFEs, Matador has called or emailed each of the working interest owners Matador seeks to pool for whom we have contact information and attempted to reach an agreement with them. **Matador Exhibit A-8** contains a general chronology of the contacts with the working interest owners Matador seeks to pool in each

respective case for whom we have contact information. In my opinion, Matador has made a good faith effort to reach an agreement with each of the working interest owners that Matador seeks to pool.

17. Matador has made an estimate of overhead and administrative costs for drilling and producing the proposed wells. It is \$7,000/month while drilling, and \$700/month while producing. These costs are consistent with what other operators are charging in this area for these types of wells. Matador respectfully requests that these administrative and overhead costs be incorporated into any orders entered by the Division in these consolidated cases.

18. In my opinion, Matador has made good faith efforts to reach an agreement with the working interest owners it is seeking to pool. If Matador reaches an agreement with any of the proposed pooled parties before the Division enters an order, I will let the Division know that Matador is no longer seeking to pool those parties.

19. Matador provided Matador's outside counsel, Jim Bruce, a list of names and addresses for the parties that Matador is seeking to pool. In compiling these notice lists, Matador conducted a diligent search of all public records in the county where the proposed wells are located and of phone directories, including computer searches.

20. **Matador Exhibits A-1 through A-8** were either prepared by me or compiled under my direction and supervision.

FURTHER AFFIANT SAYETH NOT.

STATE OF NEW MEXICO  
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES  
OIL CONSERVATION DIVISION

APPLICATION OF MATADOR  
PRODUCTION COMPANY FOR  
COMPULSORY POOLING,  
EDDY COUNTY, NEW MEXICO.

CASE NOS. 20904, 20905, 20906, 20907,  
20908, 20909, 20910, and 20911

AFFIDAVIT OF JAMES ANDREW JUETT

James Andrew Juett, of lawful age and being first duly sworn, declares as follows:

1. My name is James Andrew Juett. I work for MRC Energy Company, an affiliate of Matador Production Company ("Matador"), as an Area Geology Manager.

2. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record.

3. I am familiar with the applications filed by Matador in these cases, and I have conducted a geologic study of the lands in the subject area.

Case Nos. 20904, 20905, 20906 and 20907

4. The target interval for these four wells, the Michael K&B 2122 Fed. Com. #121H, Michael K&B 2122 Fed. Com. #122H, Michael K&B 2122 Fed. Com. #123H, and Michael K&B 2122 Fed. Com. #124H is the Bone Spring formation.

5. **Matador Exhibit B-1** is a locator map. The horizontal spacing units for the proposed wells are identified by the red boxes with green shading.

6. **Matador Exhibit B-2** is a subsea structure map that I prepared for the top of the Second Bone Spring formation. The contour interval is 50 feet. The structure map shows the Bone Spring formation gently dipping to the Southeast. The structure appears consistent across the

proposed wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments to horizontal drilling.

7. **Matador Exhibit B-3** shows a line of cross section from A to A' on the same structure map reflected in **Exhibit B-2**.

8. **Matador Exhibit B4** is a Structural cross-section I prepared that displays open-hole logs run over the Second Bone Spring formation from the three representative wells denoted from A to A'. For each well in the cross-section, the following logs are included: gamma ray, resistivity, and porosity. The proposed target interval for all four of the proposed wells is labeled and marked with a green wellbore diagram. The logs in the cross-section demonstrate that the target interval, within the Bone Spring formation, is consistent in thickness and character, across the entirety of each of the proposed spacing units.

9. All four of the proposed wells will comply with the Division's standard offset requirements.

10. Based on my geologic study of the area, I have not identified any geologic impediments to drilling horizontal wells in the area.

11. In my opinion, each quarter-quarter section will be productive and contribute more-or-less equally to production from each respective horizontal spacing unit.

12. In my opinion, horizontal drilling will be the most efficient method to develop this acreage, to prevent the drilling of unnecessary wells, and to result in the greatest ultimate recovery. Approving Matador's applications will be in the best interest of conservation, the prevention of waste, and protection of correlative rights.

Case Nos. 20908, 20909, 20910, and 20911

13. The target interval for these four wells, the Michael K&B 2122 Fed. Com. #201H, Michael K&B 2122 Fed. Com. #202H, Michael K&B 2122 Fed. Com. #203H, and Michael K&B 2122 Fed. Com. #204H, is the Wolfcamp formation.

14. **Matador Exhibit B-5** is a locator map. The horizontal spacing units for the proposed wells are identified by the red boxes with green shading.

15. **Matador Exhibit B-6** is a subsea structure map that I prepared for the top of the Wolfcamp formation. The contour interval is 50 feet. The structure map shows the Wolfcamp formation gently dipping to the Southeast. The structure appears consistent across the proposed wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments to horizontal drilling.

16. **Matador Exhibit B-7** shows a line of cross section from A to A' on the same structure map reflected in **Exhibit B-6**.

17. **Matador Exhibit B-8** is a Structural cross-section I prepared that displays open-hole logs run over the Wolfcamp formation from the three representative wells denoted from A to A'. For each well in the cross-section, the following logs are included: gamma ray, resistivity, and porosity. The proposed target interval for all four of the proposed wells is labeled and marked with a green wellbore diagram. The logs in the cross-section demonstrate that the target interval, within the Wolfcamp formation, is consistent in thickness and character, across the entirety of each of the proposed spacing units.

18. All four of the proposed wells will comply with the Division's standard offset requirements.

19. Based on my geologic study of the area, I have not identified any geologic impediments to drilling horizontal wells in the area.

20. In my opinion, each quarter-quarter section will be productive and contribute more-or-less equally to production from each respective horizontal spacing unit.

21. In my opinion, horizontal drilling will be the most efficient method to develop this acreage, to prevent the drilling of unnecessary wells, and to result in the greatest ultimate recovery. Approving Matador's applications will be in the best interest of conservation, the prevention of waste, and protection of correlative rights.

22. **Matador Exhibits B-1 through B-8** were either prepared by me or compiled under my direction and supervision.

FURTHER AFFIANT SAYETH NOT.
