Subject: [EXT] comment for OCC hearing

Hello Florene,

I tried to connect audio and it was unable to connect. Therefore, here is my written comment:

"The OCD must promulgate meaningful "produced water" rules that protect public health, the environment, and freshwater resources. With most urgency, suspend rulemaking as impacted communities need pre-rulemaking engagement and outreach, especially in these times of COVID-19. Today's a great example of trying to connect with technology to offer a public comment, but I cannot this morning in this public forum highlight the need for true engagement to hear our voices to this toxic threat."

Sincerely,

--

Wendy Atcitty
