Attachments: C-102 NSL Needed.pdf

Ms. Callahan,

One of the wells in the above application will require an administrative order for Non-Standard Location as being only 78' from the east lease line (attached). NSL's cannot be granted as part of an application for compulsory pooling, but must be separately sought and obtained through the OCD fee portal.

Therefore, so much of the application as requests approval of the well's take-points at the stated location will be *denied* in the order. Chevron will have to obtain separately an NSL for this and any other well in this or any of its applications that has a non-orthodox location.

Thank you,

Kurt Simmons
