RE: Case No. 16439, Order Number R-20322; Extension of Deadline to Inject
Well: McCloy Central SWD Well No. 1 (API 30-025-46109)
Located: Unit A, Sec 24, T24S, R32E, NMPM, Lea County, New Mexico
Order Date: January 23, 2019
Injection formations: Devonian and Silurian formations; 17424 feet to 18533 feet

Dear Mr. Vargo:

Reference is made to your November, 14 2019 request on behalf of NGL Water Solutions Permian, LLC (the "operator") to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The deadline date to commence injection under said order was one year after issuance of the order: January 23, 2020. However, the request for extension was received by the Division prior to the injection deadline and will therefore be recognized.

It is the Division's understanding from your correspondence that since the date of issuance of this permit, no additional wells that penetrate the approved injection interval were drilled and no new affected parties were identified in the one-mile Area of Review (AOR). Therefore, the extension request could be reviewed administratively for approval.

The Division finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment. Therefore, the deadline to commence injection for the existing order is hereby extended until **January 23, 2021**.

All requirements of the above referenced administrative order and agreements in the application remain in full force and effect. Any additional extension of the deadline to commence injection for this administrative order will not be considered unless the operator has already commenced drilling of the referenced well. Otherwise, the injection authority shall expire under the terms of the extended administrative order and the operator shall be required to submit a new application to obtain injection authority for the referenced well.

ADRIENNE SANDOVAL
Director
