I am in strong favor of stopping routine venting and flaring 100%. I am concerned about health of those working and living in the area; overall health of the whole area; health of the ranches and wildlife; the effect on global warming; the loss of revenue for New Mexico; the loss to projects, such as education. which the revenue supports. I see absolutely no reason to not require oil and gas companies to capture 98% of methane as soon as possible. I totally support strengthening state reporting and monitoring.

Far too many times we witness the public in short, moderate, and long-term suffering the consequences of industry paying off lack of it's own responsibility for the welfare of the public and the environment. Let this not be the case with New Mexico. Thank you.

Are you interested in making a public statement at the hearing?

- No, I do not want to sign up to make a public statement
