Re: Proposal to drill
Chaparral 33 Federal Com No.3
Section 33, Township 19 South, Range 34 East,
Lea County, NM

Dear Sir/Madam:

Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

Oil Conservation Division
Case No. _____
Exhibit No. 4B

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance.

If you elect not to participate, please so indicate on the attached election form and return it to the attention of the undersigned at the letterhead address. As an alternative, if you are not interested in participating please consider granting Cimarex a Term Assignment of your interest in Section 33. Please let us know if you would be interested in this option.

Please call the undersigned with any questions or comments.

Yours very truly,

Re: Proposal to drill
Chaparral 33 Federal Com No. 3
Section 33, Township 19 South, Range 34 East,
Lea County, NM

Dear Carolyn:

Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance.

If you elect not to participate, please so indicate on the attached election form and return it to the attention of the undersigned at the letterhead address. As an alternative, if you are not interested in participating please consider granting Cimarex a Term Assignment of your interest in Section 33. Please let us know if you would be interested in this option.

Please call the undersigned with any questions or comments.

Re: Proposal to drill
Chaparral 33 Federal Com No.3
Section 33, Township 19 South, Range 34 East,
Lea County, NM

Dear Bernadine:

Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance.

If you elect not to participate, please so indicate on the attached election form and return it to the attention of the undersigned at the letterhead address. As an alternative, if you are not interested in participating please consider granting Cimarex a Term Assignment of your interest in Section 33. Please let us know if you would be interested in this option.

Please call the undersigned with any questions or comments.

Yours very truly,

Section 33, Township 19 South, Range 34 East,
Lea County, NM

Dear Sir/Madam:

Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance.

If you elect not to participate, please so indicate on the attached election form and return it to the attention of the undersigned at the letterhead address. As an alternative, if you are not interested in participating please consider granting Cimarex a Term Assignment of your interest in Section 33. Please let us know if you would be interested in this option.

Re: Proposal to drill
Chaparral 33 Federal Com No.3
Section 33, Township 19 South, Range 34 East,
Lea County, NM

Dear Sir/Madam:

Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance.

If you elect not to participate, please so indicate on the attached election form and return it to the attention of the undersigned at the letterhead address. As an alternative, if you are not interested in participating please consider granting Cimarex a Term Assignment of your interest in Section 33. Please let us know if you would be interested in this option.

Please call the undersigned with any questions or comments.

Re: Proposal to drill
Chaparral 33 Federal Com No. 3
Section 33, Township 19 South, Range 34 East,
Lea County, NM

Dear Thomas:

Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance.

If you elect not to participate, please so indicate on the attached election form and return it to the attention of the undersigned at the letterhead address. As an alternative, if you are not interested in participating please consider granting Cimarex a Term Assignment of your interest in Section 33. Please let us know if you would be interested in this option.

Please call the undersigned with any questions or comments.

Re: Proposal to drill
Chaparral 33 Federal Com No.3
Section 33, Township 19 South, Range 34 East,
Lea County, NM

Dear Sir/Madam:

Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. Magnum Hunter Production, Inc. a wholly owned subsidiary of Cimarex Energy Co., is an owner of record title and contractual rights in Section 33, T19S-R34E, Lea County, New Mexico hereby proposes the drilling of the following well within Section 33: Chaparral 33 Federal Com No.3 - SHL 230' FNL, 810' FEL; BHL 330' FSL, 660' FEL.

Our records show that the governing agreement on this proposed well is the April 1, 1988, Joint Operating Agreement, shown as No.1 below. Numerous Operating Agreements are in effect in Section 33. However, with the exception of the April 1, 1988 Operating Agreement naming Sun Exploration and Production Company as operator, and covering all of Section 33 among other lands, all of the additional Operating Agreements cover only portions of Section 33 and apply to only a portion of the working interest owners. The Operating Agreements covering Section 33 are as follows:

1. April 1, 1988, Sun Exploration and Production Company, operator, W.A. Moncrief, Jr. et al, as non-operators.
2. May 1, 1997, Mallon Oil Company, operator, and Read and Stevens, Inc. as non-operators.
3. August 1, 1997, Read & Stevens, Inc. as operator, and Mallon Oil Company, et al as non-operators.
4. January 3, 2003, Gruy Petroleum, Inc. operator and Fuel Products, Inc., et al as non-operators.

The above well is proposed to be drilled vertically to a depth of approximately 11,200 feet to the Bone Spring formation and laterally in a southerly direction within the formation to the referenced bottom hole location. Total measured depth of the well is proposed to be approximately 15,400 feet from surface to terminus.

It should be understood that compliance with topography or cultural or environmental concerns, among others, might require modification of Cimarex's intended procedure. Cimarex will advise you of any such modifications.

Enclosed, in duplicate, is our detailed AFE reflecting estimated costs associated with this proposal. If you intend to participate, please approve and return one (1) original of the enclosed AFE, along with the contact information to receive your well data, to the undersigned. If you elect to purchase your own well control insurance, you must provide a certificate of such insurance.

If you elect not to participate, please so indicate on the attached election form and return it to the attention of the undersigned at the letterhead address. As an alternative, if you are not interested in participating please consider granting Cimarex a Term Assignment of your interest in Section 33. Please let us know if you would be interested in this option.

Please call the undersigned with any questions or comments.

Yours very truly,

A handwritten signature in black ink, appearing to read "Steve Burke". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
