**STATEMENT OF THE CASE**

COG Operating LLC seeks an order (1) creating a non-standard, 160-acre spacing and proration unit comprised of the E/2 W/2 of Section 33, Township 18 South, Range 26 East, N.M.P.M., Eddy County, New Mexico; and (2) pooling all mineral interests in the Yeso formation underlying this acreage to form a 160-acre project area in this formation. COG

30-05-40122  
proposes to dedicate the above-referenced spacing a proration unit as the project area for its proposed Tarpan 33 Fee 3H well, which it will drill to a depth sufficient to test the Yeso formation from a surface location 150 feet from the South line and 1700 feet from the West line (Unit N) to a bottom hole location 380 feet from the North line and 1700 feet from the West line (Unit C) of Section 33. The completed interval for this well will be within the 330-foot standard offset required by the rules.
