Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

Sincerely,

Amanda Graham

Subject: NM Pit Rule

Dear Ms. Davidson~~

Please forward the following message. Thank you.

Dear Ms. Bailey, Mr. Balch and Mr. Bloom:

I am writing in support of the NM Pit Rule. Protection of New Mexico's limited water supply should be the ultimate consideration in any decisions made here. Allowing the potential contamination of our water in exchange for short term profits for a few businesses is unconscionable. There are alternatives to fossil fuels. There is no alternative to potable water.

Please do the right thing for the common good. Thanks you.

Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

For the western states like New Mexico, it is especially important to protect ground water supplies, and all possible precautions should be taken.

Sincerely,

Richard Spradling

Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. Children, the elderly, the chronically ill and others with challenged immune systems are at higher risk of serious illness and death from drinking polluted water.

Are we as a state willing to risk the lives of these vulnerable New Mexicans to curry the favor of gas and oil magnates, already made disgustingly rich by citizen and environmental exploitation? Are you willing to risk our lives in this way? I urge you to maintain the Pit Rule the effectiveness of which cannot be challenged. Thank you

Sincerely,

Roberta Keppel

Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

We really need to protect the basic needs for all us humans: water, air and food supply.

Perhaps if we promoted solar and wind energy, there would be less need for oil in New Mexico and other places in the USA. Wind and Sun are a natural resource as well.

Perhaps the drilling companies can expand there line of business to solar and wind instead of having to drill in sensitive areas that will have a long term negative impact on water supply. We are in an age of allowing creative ideas and alternative ways of thinking to flourish.

If we keep doing things the way we have done for the last 60 years, we may not have the most beneficial long term outcome.

Thank you for your consideration.

Sincerely,

Steven Perley

Oil Conservation Commissioners

Dear Commissioners,

I urge you to maintain the current New Mexico Pit Rule, which protects our water supply from drilling waste.

For the last four years, New Mexico's Pit Rule has kept drilling waste out of our water supply. I urge you to maintain this effective rule.

The rule is working and companies are complying. It would be harmful for New Mexico to roll back this rule. It's a good law; please keep it in force.

Sincerely,

Susan Selbin
