**Subject:** Re: Quest for Information

Concerning the lease information, that is correct. I neglected to mention in my previous email that the pool names are also on those schematics mentioned earlier. From your previous email I believe the only thing you are currently needing is the lease boundaries.

I guess the lease information on both cases will come from Mr. Padilla.

Richard,

The A code equal "Active", and the P code equal "P&A" for the wells in the spreadsheet on case 14931. The TD's that you need in 14931 are all shown on each well schematic in the package that was submitted at hearing. There are a few unknown td's shown as "???".

If there is anything else you need from me please advise.

Thank you.

John & Mr. Padilla, Esq.

I am still waiting on information I requested for Case Nos. 14917(Tipton), and 14931(Tarco) regarding lease boundaries, pool names, TDs of AOR wells in 14931, and the meaning of A and P used in the AOR wells list, etc., etc. For example, Is A =Active or Abandoned, and Is P=Producing or Plugged? I stopped working on these until I get clarification. Thank you and have a nice day.

Richard

Richard,

Got your message and I had talked with Ernie earlier. I think he was checking on the status of the 40 acres you were talking about this morning. Anyway, I left him a message to call you.
