**Re: Case No. 15073; Order No. R-13089: Application of DCP Midstream, LP for Authority to Inject Treated Acid Gas into the Lower Cherry Canyon and Upper Brushy Canyon Formations Through Proposed Zia AGI No. 1 and Zia AGI No. 2, Lea County, New Mexico.**

Dear Ms. Bailey:

Upon review of Order No. R-13089, it has come to our attention that the bottom-hole location for the proposed Zia No. 2 well identified in Paragraph 6 of the Order has a transposed number and incorrectly states that the bottom-hole location is 1950 feet from the South line of Section 19. The correct bottom-hole location for the Zia AGI No. 2 should be 1590 feet from the South line and 1400 feet from the West line of Section 19, Township 19 South, Range 32 East, N.M. P.M., in Lea, County. The surface-hole location identified in the Order is correct as stated, only the Zia AGI No. 2's bottom-hole location is incorrect. Because this is simply a typographical error resulting from a transposition of numbers, we ask that the Commission enter a nunc pro tunc order correcting the location for Zia AGI No. 2 well. We apologize for the inconvenience and appreciate your attention to this matter.

Sincerely,

Adam G. Rankin
