Re: **Request for Extension to Complete**
Cookie Tosser State Com Well No. 2H (30-015-42440)
Division Order No. R-14022 (Case No. 15332)

Dear Mr. Carr:

The Division received your request dated August 20, 2015.

The compulsory pooling order for the subject well required that well to be drilled and completed within 120 days of the spud date. The well was spud on August 10th according to Division records and according to your letter, will not be completed by December 10th, 2015.

It is our understanding that budgetary and scheduling issues will prevent the completion of this well prior to the required date. Finding paragraph (7) of this compulsory pooling order stated that no other party contested the case.

The OCD has reviewed your request and hereby extends the date to complete this well another four months, to April 10th, 2016.

If you have any question, please contact William V. Jones at williamv.jones@state.nm.us or call (505)-476-3477.

Sincerely;

A handwritten signature in black ink that reads "David R. Catanach".

Re: Order No. R-14022/Case No. 15332: Application of COG Operating LLC for a non-standard spacing and proration unit and compulsory pooling, Eddy County, New Mexico.

Dear Mr. Catanach:

Division Order No. R-14022 granted COG Operating LLC's application for a non-standard spacing and proration unit and compulsory pooling on July 17, 2015. The order authorized the drilling of COG's Cookie Tosser State Com Well No. 2H (API No. 30-15-42440) at a location in the W/2 E/2 of Section 16, Township 18 South, Range 30 East, NMPM, Eddy County, New Mexico. A copy of the order is attached for your convenience.

Ordering Paragraph 6 of Order No. R-14022 requires the subject well be drilled and completed within 120 days after commencement thereof or the order shall be of no further effect unless COG obtains a time extension from the Division Director. COG commenced the drilling of this well on August 10, 2015. However, due to current budgetary and scheduling issues, COG will not be able to complete this well within 120 days (December 8, 2015) as provided by this order.

Therefore, COG respectfully requests an extension until April 6, 2016 to complete the Cookie Tosser State Com Well No. 2H.

Thank you for your time and attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "William F. Carr", written over a horizontal line.

William F. Carr
Senior Counsel

OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:**

**CASE NO. 15332
ORDER NO. R-14022**

**APPLICATION OF COG OPERATING LLC FOR A NON-STANDARD SPACING
AND PRORATION UNIT AND COMPULSORY POOLING, EDDY COUNTY,
NEW MEXICO**

ORDER OF THE DIVISION

BY THE DIVISION:

This case came on for hearing at 8:15 a.m. on July 9, 2015, at Santa Fe, New Mexico, before Examiner William V. Jones.

NOW, on this 17th day of July, 2015, the Division Director, having considered the testimony, the record and the recommendations of the Examiner,

FINDS THAT:

(1) Due public notice has been given, and the Division has jurisdiction of this case and of the subject matter.

(2) COG Operating LLC (the "Applicant") seeks approval of a 160-acre non-standard, oil spacing and proration unit and project area (the "Unit") for oil production from the Bone Spring formation, Loco Hills; Bone Spring, East Pool (Pool code 39513) comprising the W/2 of the E/2 of Section 16, Township 18 South, Range 30 East NMPM, in Eddy County, New Mexico. Applicant further seeks an order pooling all uncommitted interests in the Unit for the Bone Spring formation.

(3) The Unit will be dedicated to Applicant's Cookie Tossler State Com Well No. 2H (the "proposed well"; API No. 30-015-42440), a horizontal well to be drilled from a surface location 300 feet from the North line and 1180 feet from the East line (Unit letter A) of Section 16, Township 18 South, Range 30 East to a bottomhole location 330 feet from the South line and 2260 feet from the East line (Unit letter O) of Section 16, Township 18 South, Range 30 East, NMPM.

(4) The proposed oil well is within the Undesignated Loco Hills; Bone Spring, East Pool and is subject to statewide rule 19.15.15.9A, NMAC, which provides for standard 40-acre units, each comprising a governmental quarter-quarter section, and 330-foot setbacks from the unit boundaries. The proposed Unit and project area consists of four adjacently located quarter-quarter sections oriented north to south.

(5) The completed interval of the proposed well will be standard for oil production from the Bone Spring formation, Undesignated Loco Hills, Bone Spring, East Pool.

(6) Applicant appeared through counsel and presented the following land and geologic evidence:

- (a) The Bone Spring formation in this area is suitable for development by horizontal drilling;
- (b) the proposed orientation of the horizontal well north to south is appropriate for the Unit;
- (c) all quarter-quarter sections to be included in the Unit are expected to be productive in the Bone Spring formation, so that the Unit as requested will not impair correlative rights;
- (d) notice was provided for formation of the non-standard spacing unit to lessees or operators of surrounding tracts;
- (e) notice was provided for compulsory pooling within the Unit to all interest owners subject to pooling proceedings;
- (f) all parties subject to pooling were located.

(7) No other party entered an appearance or otherwise opposed this application.

The Division concludes as follows:

(8) The proposed non-standard unit should be approved in order to enable Applicant to drill a horizontal well that will efficiently produce the reserves underlying the Unit, thereby preventing waste and protecting correlative rights.

(9) Two or more separately owned tracts are embraced within the Unit, and/or there are royalty interests and/or undivided interests in oil and gas minerals in one or more tracts included in the Unit that are separately owned.

(10) Applicant is owner of an oil and gas working interest within the Unit. Applicant has the right to drill and proposes to drill the proposed well to a common source of supply within the Unit at the proposed location.

(11) There are interest owners in the Unit that have not pooled their interests.

(12) To avoid the drilling of unnecessary wells, protect correlative rights, prevent waste and afford to the owner of each interest in the Unit the opportunity to recover or receive without unnecessary expense a just and fair share of hydrocarbons, this application should be approved by pooling all uncommitted interests, whatever they may be, in the oil and gas within the Unit.

(13) COG Operating LLC should be designated the operator of the proposed well and the Unit.

(14) Any pooled working interest owner who does not pay its share of estimated well costs should have withheld from production its share of reasonable well costs plus an additional 200% thereof as a reasonable charge for the risk involved in drilling the proposed well.

(15) Reasonable charges for supervision (combined fixed rates) should be fixed at \$7000 per month while drilling and \$700 per month while producing, provided that these rates should be adjusted annually pursuant to Section III.1.A.3. of the COPAS form titled "*Accounting Procedure-Joint Operations*."

IT IS THEREFORE ORDERED THAT:

(1) A 160-acre non-standard oil spacing and proration unit (the "Unit") is hereby established for oil production from the Bone Spring formation, Undesignated Loco Hills; Bone Spring, East Pool (Pool code 39513) comprising the W/2 of the E/2 of Section 16, Township 18 South, Range 30 East, NMPM, in Eddy County, New Mexico.

(2) Also pursuant to the application of COG Operating LLC, all uncommitted interests, whatever they may be, in the oil and gas in the Bone Spring formation underlying the Unit, are hereby pooled.

(3) The Unit shall be dedicated to Applicant's Cookie Tosser State Com Well No. 2H (the "proposed well"; API No. 30-015-42440), a horizontal well to be drilled from a surface location 300 feet from the North line and 1180 feet from the East line (Unit letter A) of Section 16, Township 18 South, Range 30 East to a bottomhole location 330 feet from the South line and 2260 feet from the East line (Unit letter O) of Section 16, Township 18 South, Range 30 East, NMPM. The proposed location shall be standard.

(4) The operator of the Unit shall commence drilling the proposed well on or before July 31, 2016, and shall thereafter continue drilling the proposed well with due diligence to test the Bone Spring formation.

(5) In the event the operator does not commence drilling the proposed well on or before July 31, 2016, Ordering Paragraphs (1) and (2) shall be of no effect, unless the operator obtains a time extension from the Division Director for good cause demonstrated by satisfactory evidence.

(6) Should the proposed well not be drilled and completed within 120 days after commencement thereof, then Ordering Paragraphs (1) and (2) shall be of no further effect, and the unit and project area created by this order shall terminate, unless operator appears before the Division Director and obtains an extension of the time for completion of the proposed well for good cause shown by satisfactory evidence. If the proposed well is not completed in all of the standard spacing units included in the proposed project area (or Unit) within 120 days after commencement of drilling, then the operator shall apply to the Division for an amendment to this Order to contract the Unit so that it includes only those standard spacing units in which the well is completed.

(7) Upon final plugging and abandonment of the proposed well and any other well drilled on the Unit pursuant to Division Rule 19.15.13.9 NMAC, the pooled Unit created by this Order shall terminate, unless this Order has been amended to authorize further operations.

(8) COG Operating LLC (OGRID 229137) is hereby designated the operator of the well and the Unit.

(9) After pooling, uncommitted working interest owners are referred to as pooled working interest owners. ("Pooled working interest owners" are owners of working interests in the Unit, including unleased mineral interests, who are not parties to an operating agreement governing the Unit.) After the effective date of this Order, the operator shall furnish the Division and each known pooled working interest owner in the Unit an itemized schedule of estimated costs of drilling, completing and equipping the proposed well ("well costs").

(10) Within 30 days from the date the schedule of estimated well costs is furnished, any pooled working interest owner shall have the right to pay its share of estimated well costs to the operator in lieu of paying its share of reasonable well costs out of production as hereinafter provided, and any such owner who pays its share of estimated well costs as provided above shall remain liable for operating costs but shall not be liable for risk charges. Pooled working interest owners who elect not to pay their share of estimated well costs as provided in this paragraph shall thereafter be referred to as "non-consenting working interest owners."

(11) The operator shall furnish the Division and each known pooled working interest owner (including non-consenting working interest owners) an itemized schedule of actual well costs within 90 days following completion of the proposed well. If no objection to the actual well costs is received by the Division, and the Division has not objected, within 45 days following receipt of the schedule, the actual well costs shall be deemed to be the reasonable well costs. If there is an objection to actual well costs within

the 45-day period, the Division will determine reasonable well costs after public notice and hearing.

(12) Within 60 days following determination of reasonable well costs, any pooled working interest owner who has paid its share of estimated costs in advance as provided above shall pay to the operator its share of the amount that reasonable well costs exceed estimated well costs and shall receive from the operator the amount, if any, that the estimated well costs it has paid exceed its share of reasonable well costs.

(13) The operator is hereby authorized to withhold the following costs and charges from production from each well:

- (a) The proportionate share of reasonable well costs attributable to each non-consenting working interest owner; and
- (b) As a charge for the risk involved in drilling the well, 200% of the above costs.

(14) The operator shall distribute the costs and charges withheld from production, proportionately, to the parties who advanced the well costs.

(15) Reasonable charges for supervision (combined fixed rates) for the well are hereby fixed at \$7000 per month while drilling and \$700 per month while producing, provided that these rates shall be adjusted annually pursuant to Section III.1.A.3. of the COPAS form titled "*Accounting Procedure-Joint Operations*." The operator is authorized to withhold from production the proportionate share of both the supervision charges and the actual expenditures required for operating the well, not in excess of what are reasonable, attributable to pooled working interest owners.

(16) Except as provided in Paragraphs (13) and (15) above, all proceeds from production from the proposed well that are not disbursed for any reason shall be held for the account of the person or persons entitled thereto pursuant to the Oil and Gas Proceeds Payment Act (NMSA 1978 Sections 70-10-1 through 70-10-6, as amended). If not disbursed, such proceeds shall be turned over to the appropriate authority as and when required by the Uniform Unclaimed Property Act (NMSA 1978 Sections 70-8A-1 through 70-8A-31, as amended).

(17) Any unleased mineral interests shall be considered a seven-eighths (7/8) working interest and a one-eighth (1/8) royalty interest for the purpose of allocating costs and charges under this Order. Any well costs or charges that are to be paid out of production shall be withheld only from the working interests' share of production, and no costs or charges shall be withheld from production attributable to royalty interests.

(18) Should all the parties to this compulsory pooling order reach voluntary agreement subsequent to entry of this Order, this order shall thereafter be of no further effect.

(19) The operator of the well and the Unit shall notify the Division in writing of the subsequent voluntary agreement of all parties subject to the compulsory pooling provisions of this Order.

(20) Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
