The Decision stated that the lease was in a producing status and minimum royalty or royalty will continue to be due and payable. This extension was granted in the event production ceased before the expiration date of the two year extension. By Decision dated January 9, 2015, Communitization Agreement CA SRN-1567 terminated. Therefore, Federal Lease NMNM 030752 which is held by actual production, was automatically extended two years through December 1, 2011 and for so long thereafter as oil and gas is produced in paying quantities.

According to the agreement, on or before March 15, 1979 the operator was to commence the drilling of a well at a lawful location on the S½ of Section 28 and thereafter continue drilling the well with due diligence to a depth sufficient to adequately test the Morrow series of the Pennsylvanian formation or to 11,500' below the surface, whichever is the lesser depth, unless granite or other practically impenetrable substance or condition in the hole, which renders further drilling impracticable, is encountered at a lesser depth or unless all parties agree to complete or abandon the well at a lesser depth. Each party shall pay or deliver or cause to be paid or delivered all royalties to the extent of 12½% of 8/8 due on its share of production. The agreement provides for a 100%/300%/300% non-consent penalty. The agreement also contains a preferential right to purchase provision which states as follows:

Should any party desire to sell all or any part of its interest under this agreement, or its rights and interest in the Contract Area, it shall promptly give written notice to the other parties, with full information concerning its proposed sale, which shall include the name and address of the prospective purchaser (who must be ready, willing and able to purchase), the purchase price, and all other terms of the offer. The other parties shall then have an optional prior right, for a period of 10 days after receipt of the notice, to purchase on the same terms and conditions the interest which the other party proposes to sell; and, if this option right is exercised, the purchasing party shall share the purchased interest in the proportions of the interest of each bears to the total interest of all purchasing parties. However, there shall be no preferential right to purchase in those cases where any party wishes to mortgage its interest, or to dispose of its interest by merger, reorganization, consolidation, or sale of all or substantially all of its assets to a subsidiary or parent company or to a subsidiary of a parent company, or to any company in which any one party owns the majority of the stock.

The agreement is to remain in force and effect as long as any well is capable of production in paying quantities, plus an additional 90 days. The copy of the agreement submitted for my examination was executed by Hondo Drilling Company, T. J. Sivley, W. T. Wynn, John William Miller, Forrest Church Miller, Laredo Gertrude McKinney, Evelyn Dorothy Miller and Don C. Bell, II and Sidney C. Skaar as Co-Trustees in reorganization proceedings for John H. Trigg and Pauline V. Trigg.

Chapter 5 (H.B. 827). According to this Act, prior to initial entry upon the land for activities that do not disturb the surface, including inspections, staking, surveys, measurements and general evaluation of proposed routes and sites for oil and gas operations, the operator shall provide at least five business days notice by certified mail or hand delivery to the surface owner. In addition, no less than thirty days before first entering the surface of the land to conduct oil and gas operations, an operator shall, by certified mail or hand delivery, give the surface owner notice of the planned oil and gas operations as more particularly described in the Act. In an action brought pursuant to the Surface Owners Protection Act, if the court finds that compensation is owed under Section 3 of the Act, the court may also award the prevailing party attorney's fees, costs and treble damages if the court finds by clearly convincing evidence that the operator willfully and knowingly entered upon the premises for the purposes of commencing the drilling of a well without giving notice of the entry as required by Subsection B of Section 4 of the Surface Owners Protection Act or without a surface use and compensation agreement with the surface owner and before depositing a bond or other surety pursuant to Section 5 of the Surface Owners Protection Act or either the surface owner or the operator willfully and knowingly violated the surface use and compensation agreement.

REQUIREMENT: Prior to entering upon any portion of captioned land which is private fee surface land, you must comply with the notice provisions of the Surface Owners Protection Act.

66.

The Commissioner of Public Lands has issued a notice that pursuant to Section 18-6-9 NMSA 1978, it is a criminal offense to willfully destroy an archeological site on state trust lands such as the captioned lands. The notice does not require a clearance survey as a prerequisite to entry.

REQUIREMENT: You must take care that your surface activities on the NW¼ of Section 28 will not interfere with any recognized archeological site. In this connection, you should contact the office of the State Archeologist in order to be certain that drilling activities will not interfere with any archeological areas that may be located on captioned land.
