**Subject:** RE: GMT Applications for Grenache 32 State Wells

Phil,

The ~~initial and amended~~ applications that I filed on behalf of GMT Exploration address the same well, the Grenache "32" State Com #1H. I filed the amended application for the sole purpose of changing the incorrect property description of the proposed project area in the initial application (the initial application is now moot). The correct property description of the project area for the Grenache "32" State Com #1H well is the E/2 W/2 of Section 32, T21S, R32E, as indicated in the amended application.

I hope this clarifies things for you.

Gary

**Subject:** GMT Applications for Grenache 32 State Wells  
**Importance:** High

Gary:

Need a clarification for the record. You have submitted two applications for nonstandard spacing/proration/compulsory pooling for the Grenache 32 State Com Well(s). One describes a project area of W/2E/2 while the other describes the E/2W/2 (Sec. 32-T21S-R-32E). Both applications have the well number of 1H. Looking at what is in RBDMS, I see an approved APD for 30-025-43359, the Grenache 32 State Com Well 2H, with the project area as E/2W/2 which does coincide with one application's description, but not the well name. Please provide solution to this perplexing problem so that the poorly-compensated and recently abused state employee (who is filling-in for Florene) can publish the new case Docket list in a timely fashion. Thanks. PRG
