**APPLICATION FOR POOL LEASE COMMINGLE, OFF-LEASE MEASUREMENT, SALES, & STORAGE,
Commingling proposal for Cedar Canyon 23-3H Satellite**

OXY USA INC is requesting approval for Pool Lease Commingle, and Off-lease Measurement, Storage & Sales for wells located on the attached spreadsheet. A map showing surface hole locations and laterals for each of the wells is also attached.

Oil & Gas metering:

Incoming wells will be routed to the 3 phase production separator at the satellite facility located at Cedar Canyon 23-3H well pad at 32.202503,-103.963914. The production separator will be equipped with a gas orifice meter (S/N*), oil turbine meter with prover loops (S/N*) and water turbine (S/N*) meters. There will also be a test separator at the satellite facility equipped with a gas orifice meter (S/N*), oil turbine meter with prover loops (S/N*) and water turbine (S/N*) meters.

Oxy proposes to allocate production by well test. The wells are located on multiple Federal leases and CA's that are all 12.5% royalty. There is diverse WI & ORRI amongst some of the wells as outlined on the attached ownership list spreadsheet. Notice will be provided to all affected parties as per attached notice list. Wells are expected to decline below their top allowable within the first 4 months of production. Furthermore, the estimated percent of decline after 6 months is between 54-65%.

Gas meter on production separator S/N* & on test separator S/N* located at the satellite facility will serve as custody transfer point (Facility Measurement Point) for the purposes of royalty payment. Gas production from the 23-3H satellite facility will then be routed to Enterprise sales meter (S/N: 68841), located at 32.222, -103.974.

Oil production from the 23-3H satellite facility will be further metered off-lease, through a Coriolis meter (S/N*), located at the Cedar Canyon 22 central satellite facility. This Coriolis meter will serve as custody transfer point (FMP) for the purposes of Federal royalty payment.

Water production will be routed to the Cedar Canyon 22 CTB and then sent to the Cedar Canyon Salt Water Disposal Distribution system, where it will flow to the nearest SWD which has capacity to accept water. Salt Water Disposals tied to this SWD include the Cedar Canyon 28 Federal 4 SWD, Cedar Canyon 15 SWD, Riverbend Federal 8 SWD, Harroun 15-3 SWD and Cedar Canyon 16-3.

Meters will be proved and calibrated according to current API, NMOCD and BLM standards.

Process and Flow Descriptions:

The flow of production is shown in detail on the enclosed facility diagram. Also enclosed is a map detailing the lease boundaries, well surface hole locations and laterals. Commingling this production is the most effective means of producing the reserves and will not result in reduced royalty or improper measurement of production.

OXY USA INC understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOCD and BLM regulations.

The working interest, royalty interest and overriding royalty interest owners have been notified of this proposal by certified mail (see attached).

APPLICATION FOR POOL LEASE COMMINGLE, OFF-LEASE MEASUREMENT, SALES, & STORAGE,
Commingling proposal for Cedar Canyon 23-3H Satellite

OXY USA INC is requesting approval for Pool Lease Commingle, and Off-lease Measurement, Storage & Sales for wells located on the attached spreadsheet. A map showing surface hole locations and laterals for each of the wells is also attached.

Oil & Gas metering:

Incoming wells will be routed to the 3 phase production separator at the satellite facility located at Cedar Canyon 23-3H well pad at 32.202503,-103.963914. The production separator will be equipped with a gas orifice meter (S/N*), oil turbine meter with prover loops (S/N*) and water turbine (S/N*) meters. There will also be a test separator at the satellite facility equipped with a gas orifice meter (S/N*), oil turbine meter with prover loops (S/N*) and water turbine (S/N*) meters.

Oxy proposes to allocate production by well test. The wells are located on multiple Federal leases and CA's that are all 12.5% royalty. There is diverse WI & ORRI amongst some of the wells as outlined on the attached ownership list spreadsheet. Notice will be provided to all affected parties as per attached notice list. Wells are expected to decline below their top allowable within the first 4 months of production. Furthermore, the estimated percent of decline after 6 months is between 54-65%.

Gas meter on production separator S/N* & on test separator S/N* located at the satellite facility will serve as custody transfer point (Facility Measurement Point) for the purposes of royalty payment. Gas production from the 23-3H satellite facility will then be routed to Enterprise sales meter (S/N: 68841), located at 32.222, -103.974.

Oil production from the 23-3H satellite facility will be further metered off-lease, through a Coriolis meter (S/N*), located at the Cedar Canyon 22 central satellite facility. This Coriolis meter will serve as custody transfer point (FMP) for the purposes of Federal royalty payment.

Water production will be routed to the Cedar Canyon 22 CTB and then sent to the Cedar Canyon Salt Water Disposal Distribution system, where it will flow to the nearest SWD which has capacity to accept water. Salt Water Disposals tied to this SWD include the Cedar Canyon 28 Federal 4 SWD, Cedar Canyon 15 SWD, Riverbend Federal 8 SWD, Harroun 15-3 SWD and Cedar Canyon 16-3.

Meters will be proved and calibrated according to current API, NMOCD and BLM standards.

Process and Flow Descriptions:

The flow of production is shown in detail on the enclosed facility diagram. Also enclosed is a map detailing the lease boundaries, well surface hole locations and laterals. Commingling this production is the most effective means of producing the reserves and will not result in reduced royalty or improper measurement of production.

OXY USA INC understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOCD and BLM regulations.

The working interest, royalty interest and overriding royalty interest owners have been notified of this proposal by certified mail (see attached).
