**Subject:** Application for CK Disposal proposed surface waste management facility

Mr. Karger,

As part of OCD's technical review and in response to potential concerns raised by other interests in the area, please undertake numeric modeling of potential hydrogen sulfide emissions from the evaporation ponds to estimate worst case and probable ground level atmospheric concentrations both on- and off-property that might be associated with your proposed facility. Feel free to contact Dr. Richardson and myself with any questions you or your engineering team might have. Once this effort is completed, please provide the results including supporting documentation to the Division. Thank you.
