STATEMENT OF THE CASE

APPLICANT

In the above cases XTO Energy Inc. ("XTO") seeks approval of non-standard spacing and proration units, and compulsory pooling, for a number of horizontal Bone Spring and Wolfcamp wells in Sections 24, 25, and 36, Township 23 South, Range 29 East, N.M.P.M. The wells are 1-1/2 miles in length. These cases are currently scheduled for the October 12th hearing.

OPPONENT

Devon is a working interest owner in the E/2 of Sections 22, all of Section 23, and all of Section 24, Township 23 South, Range 29 East, N.M.P.M., and has plans to drill a number of east-west horizontal wells in the Bone Spring and Wolfcamp formations on its acreage. The E/2 of Sections 22, all of Section 23 cannot be developed by north-south horizontal wells due to potash restrictions. If XTO is permitted to drill its north-south horizontal wells as proposed, it will strand Devon's acreage in the E/2 of Section 22 and Section 23.

Devon has filed an application (Case No. 15,864) seeking an order canceling or suspending twenty four (24) applications for permit to drill issued to XTO for its wells located in Section 24 and the N/2 of Section 25. This is needed so that a development plan can be fixed for all of the subject acreage in this portion of the oil-potash area. If Devon's application is granted, it will also affect the drilling plans for XTO's wells in the S/2 of Section 25 and Section 36. This matter is scheduled for the October 26th hearing.

Devon requests that XTO's pooling applications be denied.
