RE: Injection Pressure Increase  
Ranger SWD Well No. 6  
Lea County, New Mexico

Dear Sir:

Reference is made to your request dated December 30, 1987, to increase the surface injection pressure on the Ranger SWD Well No. 6. This request is based on a step rate test conducted on the well on December 17, 1987. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on the well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well.

WELL & LOCATION

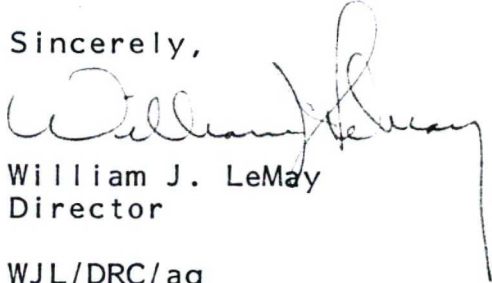

MAXIMUM INJECTION  
SURFACE PRESSURE

Ranger SWD Well No. 6  
660 FSL & 1978 FWL (Unit N)  
Section 23, T-12 South, R-34 East,  
NMPM, Lea County, New Mexico

3480 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

A handwritten signature in dark ink, appearing to read 'William J. LeMay', with a long, sweeping vertical line extending downwards from the end of the signature.

William J. LeMay  
Director
