Case 13668

2006 FEB 14 PM 12 36

Re: Application of Burlington Resources Oil & Gas Company LP
for an exception to the well density requirements of the
Special Rules and Regulations for the Blanco-Mesaverde
Gas Pool, Rio Arriba County, New Mexico

W/2 Section 11, T29N, R7W including the simultaneous dedication
of the San Juan 29-7 Unit Well 57A (Unit Letter F) and the
San Juan 29-7 Unit Well 57C (Unit Letter F) both located in the
same 40-acre tract of the spacing unit.

Dear Mr. Fesmire:

On behalf of Burlington Resources Oil & Gas Company LP, please
find enclosed our referenced application which we request be set for
hearing on the Examiner's docket now scheduled for March 16, 2006. Also
enclosed is our proposed advertisement of this case for the NMOCDD
docket.

Very truly yours,

W. Thomas Kellahin

cc: Burlington Resources Oil & Gas Company LP
Attn: Alan Alexander

CASE 13668: Application of Burlington Resources Oil & Gas Company LP for an exception to the well density requirements of the Blanco-Mesaverde Gas Pool, Rio Arriba County, New Mexico. Applicant seeks an exception to the well density requirements of Rule I.B of the Special Rules and Regulations for the Blanco-Mesaverde Gas Pool to permit it to produce the following 2 Mesaverde gas wells in the same quarter-quarter section (SE/4NW/4) on a standard spacing and proration unit comprised of the W/2 of Section 11, T29N, R7W, NMPM:

(a) the San Juan 29-7 Unit Well No. 57A (API #30-039-2556700) located 1840 feet FWL and 1850 feet FNL (Unit F) of this section; and

(b) the San Juan Unit 29-7 Well No. 57C (API #30-039-2585700) located 2620 feet FWL and 1545 feet FNL (Unit F) of this section; and

These wells are located approximately 6 miles southeast of the Navajo Dam, New Mexico.

**IN THE MATTER OF THE APPLICATION OF
BURLINGTON RESOURCES OIL & GAS COMPANY LP
FOR AN EXCEPTION TO THE WELL DENSITY
REQUIREMENTS FOR THE BLANCO-MESAVERDE
GAS POOL, RIO ARRIBA COUNTY, NEW MEXICO.**

CASE NO. 13668

APPLICATION

Burlington Resources Oil & Gas Company LP. ("Burlington") by its attorneys, Kellahin & Kellahin, seeks an order for an exception to the well density requirements of the Blanco-Mesaverde Gas Pool, Rio Arriba County, New Mexico. Applicant seeks an exception to the well density requirements of Rule I.B of the Special Rules and Regulations for the Blanco-Mesaverde Gas Pool to permit it to produce the following 2 Mesaverde gas wells in the same quarter-quarter section (SE/4NW/4) on a standard spacing and proration unit comprised of the W/2 of Section 11, T29N, R7W, NMPM:

(a) the San Juan 29-7 Unit Well No. 57A (API #30-039-2556700) located 1840 feet FWL and 1850 feet FNL (Unit F) of this section; and

(b) the San Juan Unit 29-7 Well No. 57C (API #30-039-2585700) located 2620 feet FWL and 1545 feet FNL (Unit F) of this section; and

In support of its application Burlington states:

- (1) Burlington is the current operator of the San Juan 29-7 Unit that includes, among other acreage, the W/2 of Section 11, T29N, R7W, San Juan County, New Mexico.

(2) This spacing unit currently contains five wells (three standard completions, one pilot horizontal completion and one pressure observation well) completed in the Blanco-Mesaverde Gas Pool as follows:

(a) the San Juan 29-7 Unit Well No. 57A (API #30-039-2556700) located 1840 feet FWL and 1850 feet FNL (Unit F) of this section; and

(b) the San Juan Unit 29-7 Well No. 57C (API #30-039-2585700) located 2620 feet FWL and 1545 feet FNL (Unit F) of this section; and

(c) the San Juan 29-7 Unit Well No. 57 (API #300390765500) located 1650 feet FSL and 990 feet FWL (Unit L) of this section.

(d) the San Juan 29-7 Unit Well No. —57B (API #300392563300) surface located 1500 feet FSL and 1660 feet FEL (Unit J) and bottom hole located 475 feet FSL and 2340 feet FWL (Unit N) of this section.

(e) the San Juan 29-7 Unit Well No. 300 (API #300392549800) the surface is located 800 feet FSL and 800 feet FWL (Unit M) of this section.

(3) The Blanco-Mesaverde Gas Pool is governed by Special Rules and Regulations which provide for 320-acre spacing and proration units on which as many as four wells may be drilled. See Order R-8170, as superseded by Order R-10987-A, effective February 1, 1999 and amended by Order R-10987-A (1), effective December 2, 2002 and Pilot well Order R-10720, effective January 9, 1997. This Special Pool Rules and Regulations provide, among other things, that an infill well shall not be located within the same quarter-quarter section (40-acre tract) and another well.

(4) On or about June 21, 1998, Burlington completed the San Juan 29-7 Unit Well No. 57C, such that the No. 57A and the No. 57C are both in the same quarter-quarter section and are located at standard distances from the outer boundaries of this GPU.

- (5) Upon becoming aware of its mistake, on February 6, 2006, Burlington shut-in the Well No. 57A that remains shut-in and is not producing from the Mesaverde formation.
- (6) While the total number of producing (excluding the No. 57B Pilot well and the No. 300 Observation well) wells in this Mesaverde gas proration unit ("GPU") is less than what is allowed, the Well No. 57A and Well No. 57C are located in the same quarter-quarter section and therefore are in violation of the density requirements of this Special Pool Rules.
- (7) Burlington therefore requests that the Division enter its order granting an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool approving the location of the San Juan 29-7 Unit Well No. 57A and the Well No. 57C in the same quarter-quarter section and authoring Burlington to simultaneously produce both wells.
- (8) Approval of this application will not impair the correlative rights of any other interest owner in the Blanco-Mesaverde Gas Pool and will afford Burlington the opportunity to utilize the existing wells to produce the reserves from this GPU.
- (9) Approval of this application will be in the best interests of conversations, the prevention of waste and the protection of correlative rights.

WHEREFORE, Burlington Resources Oil & Gas Company, LP requests that this application be set for hearing before an Examiner of the Oil Conservation Division on March 16, 2006 and after notice and hearing as required by law, the Division enter its order granting an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool approving the location of the San Juan 29-7 Unit Wells No. 57A and No. 57C in the Mesaverde formation and authorizing Burlington to simultaneously produced both wells.
