Jim

At the hearing on June 21, you indicated you would supplement the record with (1) step rate test and (2) proof of who are "affected persons" for notice. The step rate test was received, and is in the file. I am unable to find the latter information.

Rule 701 requires notice to all affected persons with respect to any tract that lies wholly or partially within the one-half mile AOR. You gave notice to three operators and to BLM. That may be all the required persons, but there is no evidence from which I can determine that. We need an identification by tract of the owners notified and the character of their interest that causes them to be "affected persons" per Rule 1210.

If you have furnished this information, and it did not get properly filed, please advise, and accept our apologies; though if it is readily available to you, it would probably be more expeditious for you to send us another copy than for us to locate it.

Thanks

David Brooks
