Pump was being pulled and was hung on the top two joints of casing which came unscrewed when these were pulled the surface sand and red bed fell in. The well was then cleaned out the pipe rerun and 10 sacks of cement was pored in on the out side of the pipe this filled up to within 15 ft. of the surface there was no cement that ever came into the well the bottom of the pipe set in mud when the well was completed still had a good shut off the pipe is well tied in so that this will not happen again. The pump was again run and turned into the tank on 12/2/57
