Attention: Mr. Joe D. Ramey

Gentlemen:

BTA Oil Producers has reviewed subject application as an offset operator and concludes that applicant has no geologic basis for an unorthodox location. Amoco should be able to drill a standard location on either a proration unit consisting of the S/2 of subject Section 3 or a proration unit consisting of the E/2 of subject Section 3.

BTA will not be represented if this matter should be set for public hearing.
