Re: **NOTIFICATION OF ELECTION**

Compulsory Pooling
Well: Kelly A Well No. 3E, Unit P, API #30-045-(yet to be issued)
Dedication: E/2 Section 15, T31N, R10W, NMPM
San Juan County, New Mexico
NMOCD Case 14188

Dear Mr. Kelly:

On behalf of Burlington Resources Oil & Gas Company and in accordance with the terms of the New Mexico Oil Conservation Division Order R-13057, copy enclosed, I am providing you with notice of your right to elect to participate in the drilling, completion and production of this well into the Dakota and Mesaverde formations pursuant to this order.

Burlington's records indicate that you have a working interest ownership in these 320-acre spacing units for the Mesaverde Formation in this well. Should you desire to participate in this well and avoid the payment of the 200% risk factor out of its share of production, then within thirty days of the date you receive this letter, Burlington Resources Oil & Gas Company, 3401 East 30th Street, Farmington, NM 87402 must receive a cashier's check for your percentage of the completed well costs and a letter signed by you agreeing to participate in this well pursuant to this pooling order. Enclosed is a copy of the AFE for this well, which is the same AFE introduced at the hearing.

Alternatively, you may choose to execute the new operating agreement that was previously sent to you. By doing so, you have the same opportunities available to you under the pooling order, plus the additional benefits afforded under the operating agreement that are not afforded under the order. In either case, you may choose not to participate in the costs of drilling the well, and the penalty is the same. A copy of the signature page from the operating agreement is enclosed if you should choose to take this option. Please execute it and return it. If you choose to sign the operating agreement, we will remove you from the pooling order.

If you decide not to participate, or to not sign the operating agreement, then you need do nothing further. In that event, Burlington will pay your share of the costs of drilling and completing the well and will recover your share out of production plus an additional 200 percent.

Very truly yours,
