6. **CASE 14315: Application of Burlington Resources Oil & Gas Company LP for compulsory pooling, San Juan County, New Mexico.** Applicant seeks an order pooling all mineral interests in the Dakota formation underlying the W/2 of Section 16, T30N, R8W, NMPM, San Juan County, New Mexico, forming a standard 320-acre gas spacing and proration unit for the Mesaverde and Dakota formation spaced on 320-acre spacing. This unit is to be dedicated to its Delhi No. 1B well a directional wellbore to be drilled and completed at a standard surface location in Unit F and a standard subsurface location in Unit L of this section as downhole commingled wellbore for production from the Dakota and Mesaverde formations. Also to be considered will be the costs of drilling and completing said well and the allocation of the costs thereof as well as actual operating costs and charges for supervision, designation of applicant as the operator of the well and, pursuant to Commission Order R-11992, a 200% charge for the risk involved in this well. This unit is located approximately 7-1/4 miles East-Southeast of the Aztec, New Mexico. IN THE ABSENCE OF OBJECTION, THIS APPLICATION WILL BE TAKEN UNDER ADVISEMENT
7. **~~CASE 14316~~: Application of RSC Resources Limited Partnership for approval of a non-standard oil spacing and proration unit and compulsory pooling, Eddy County, New Mexico.** Applicant seeks an order approving a non-standard oil spacing and proration unit (project area) comprised of Lot 1, NE/4 NW/4, and N/2 NE/4 (the N/2 N/2 equivalent) of Section 31, Township 16 South, Range 28 East, NMPM, to form a non-standard 162.68-acre oil spacing and proration unit (project area) for any and all formations or pools developed on 40-acre spacing within that vertical extent, and pooling all mineral interests in the Wolfcamp formation (Dog Canyon-Wolfcamp Pool) underlying the non-standard unit. The unit is to be dedicated to the Lucky Wolf "31" Fed. Com. Well No. 1, a horizontal well to be drilled at a surface location 330 feet from the North line and 150 feet from the West line of Section 30. The well will penetrate the Wolfcamp formation at an orthodox location 330 feet from the North line and approximately 330 feet from the West line, and have a terminus 330 feet from the North line and 330 feet from the East line, of Section 31. Also to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The unit is located approximately 11 miles East-northeast of Artesia, New Mexico.
8. **CASE 14245 (reopened and readvertised): Application of RSC Resources Limited Partnership for approval of a non-standard oil spacing and proration unit and compulsory pooling, Eddy County, New Mexico.** Applicant seeks an order approving a non-standard oil spacing and proration unit (project area) comprised of Lot 4, SE/4 SW/4, and S/2 SE/4 (the S/2 S/2) of Section 30, Township 16 South, Range 28 East, NMPM, to form a non-standard 162.77-acre oil spacing and proration unit (project area) for any and all formations or pools developed on 40-acre spacing within that vertical extent, and pooling all mineral interests in the Wolfcamp formation underlying the non-standard unit. The unit is to be dedicated to the Lucky Wolf "30" Fed. Com. Well No. 1, a horizontal well to be drilled at a surface location 860 feet from the South line and 100 feet from the West line of Section 30. The well will penetrate the Wolfcamp formation at a point approximately 860 feet from the South line and 330 feet from the West line, and have a terminus 990 feet from the South line and 330 feet from the East line, of Section 30. Also to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well. The unit is located approximately 11 miles East-northeast of Artesia, New Mexico.
