STATEMENT OF CASE

APPLICANT

Cimarex Energy Co. seeks an order approving a 160-acre non-standard oil spacing and proration unit (project area) in the Bone Spring formation comprised of the S/2 N/2 of Section 35, Township 19 South, Range 34 East, NMPM. Applicant further seeks the pooling of all mineral interests (i) from the surface to the top of the Bone Spring formation underlying the SW/4 NW/4 of Section 35 to form a standard 40-acre oil spacing and proration unit, and (ii) the Bone Spring formation underlying the S/2 N/2 of Section 35 to form a non-standard 160-acre oil spacing and proration unit (project area). The units are to be dedicated to the Mallon 35 Fed. Well No. 6, a horizontal well to be drilled with a surface location 2310 feet from the north line and 330 feet from the west line, with a terminus 1980 feet from the north line and 510 feet from the east line of Section 35. Also to be considered will be the costs of drilling and completion the well and the allocation of the costs thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for risk involved in drilling and completing the well.

OPPOSITION OF OTHER PARTY

Fuel Products, Inc. and Pear Resources are owners of working interest in the acreage that is covered by this compulsory pooling application and object to the drilling of these wells under an existing JOA as proposed. We do not believe it is prudent to prosecute the drilling of four horizontal wells in a single section within the time constraints required under a single JOA with four proposals of even date.

We object to the inclusion of our interests that are covered by a JOA in a force pooling application and request that those interests be so identified so there is no confusion as to what acreage is subject to pooling and what is governed by private agreement. Fuel Products Inc. and Pear Resources have received a unexecuted JOA from Cimarex covering this land and remains interested in resolving these issues by agreement - not through compulsory pooling.
